

ACADEMIC HONORS PROGRAM IN KINESIOLOGY

The Academic Honors Program at Colorado Mesa University (CMU) offers highly motivated undergraduates with enriched studies in their academic major. Completion of honors requirements varies by academic program, but each includes opportunities for students to actively engage in more advanced study through coursework and a Capstone Project that will include research and presented in a scholarly venue. Students completing a program's academic honors requirements are recognized at CMU's Commencement Ceremony.

Application Process and Qualifications

General: Students seeking participation in an Academic Honors Program must have earned at least 45 semester credit hours with a minimum 3.5 grade point average (GPA) at the time of application. An application process occurs each semester, and interested students should contact the Academic Department Head for the application deadline. In addition to the credit hour and GPA qualifications, an applicant also should submit:

- 1) the application form found on the reverse side of this page; and
- 2) a summary of no more than three pages that
 - a) details the applicant's scholarly background, community and/or University service, and academic awards; and
 - b) describes briefly why s/he is applying for an academic honors program of study.

Program Requirements

General Requirements: All students completing an Academic Honors program of study are expected to complete a senior capstone activity. The activity can range from an honor's thesis to a creative work to an undergraduate research project. Additionally, students must present the results of their activity in a scholarly venue approved by their Academic Honors Program advisor (e.g., CMU's Student Showcase, a regional meeting for the relevant discipline).

Requirements Specific to Majors in the Department of Kinesiology (Athletic Training, Exercise Science, Kinesiology, and Sport Management):

- Select an Academic Honors Program faculty advisor from within the Department of Kinesiology;
- Honors Work by Contract in Upper-Division Courses (six credits): During their junior and senior years, Honors Program students arrange to do advanced work in select upper-division courses, most often in their major fields;
- Honors Structured Research Courses (six credits): Capstone research experience with a formal manuscript and presentation. Topic, methods, and writing are to be guided and approved by a faculty member;
- Must maintain a 3.5 GPA
