

BROWN BAG MATH COLLOQUIUM

SPEAKER: Daniel Messano
US Army Signal Specialist
and CMU Computer Science Graduate

TITLE: Computers, Networks, and Math in the
Military

WHEN: Friday Nov. 20, 2015 at noon

WHERE: Houston Hall 205

ABSTRACT:

This talk will cover the use of computers, networks, and math in the military. We will cover how complex satellite communications, along with wired and wireless networks, enable near real time data and situational awareness across the military. Encryption and the math behind it will also be covered. Careers using math or computer science degrees, both in the military and contracting companies will be discussed.
