BROWN BAG SEMINAR

SPEAKER: **Mike Burkes**
Senior Data Analyst at Rocky Mountain Health Plans and Proud CMU Alumni

TITLE: **A Career Path with a Degree in Mathematics**

WHEN: **Friday, Feb. 20, 2015 at noon**

WHERE: WS 131

ABSTRACT: Health insurance is a dynamic and rapidly evolving industry. Anyone working in the health care field can attest to its challenging nature. Degrees in mathematics, statistics and computer science have the potential to create many different opportunities in the health care industry. One position intricately involved in some of the most exciting work is a data analyst. In this talk we will partially answer some of the following questions:

What does a data analyst do and what makes it such a great career?

What knowledge and skills are invaluable to a data analyst in this field?

What kind of projects are data analysts involved in?
