About This Emphasis . . .

The Associate of Arts (A.A.) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The A.A. is the appropriate choice for students who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado.

The CIS A.A. degree, in addition to providing students with all of their general education is useful in giving students a working knowledge of computer hardware and software. They learn to use common productivity tools such as presentation software, spreadsheets and database management software. This skill set will give students an edge in most future classes that they intend to take. If a student stops with only an associate’s degree, the CIS A.A. provides several skills that he/she can use in the workplace immediately.
