About This Major . . .

Sociology is the study of social life, social change, social organization, and the social causes and consequences of human behavior. Sociologists investigate the structure of groups, organizations, and societies, as well as how people interact within these contexts. Since all human behavior is social, the subject matter of sociology ranges widely from intimate families to hostile mobs; from organized crime to religious cults; and from the divisions of race, class and gender to the common beliefs in a culture. Sociology provides many distinctive perspectives on the social world, as well as a range of research methodologies that can be applied to virtually any aspect of social life, from corporate downsizing to problems of peace and war to the expression of emotion and beyond. Because sociology addresses the most challenging issues of our time, it is an expanding field whose potential is increasingly tapped by those who craft policies and create social programs. (www.asanet.org/public/what.html)

Sociology majors gain important skills in critical thinking, research methods and responsible citizenship. The Anthropology concentration emphasizes the fact that the student can also play a constructive role as a world citizen. Anthropology students can apply their knowledge to any graduate school or career path entailing the understanding and management of cultural diversity within the U.S. or overseas.
