About This Major . . .

The Bachelor of Science in Accounting is a degree in demand today as organizations face the challenge of increased financial reporting and responsibility. This program provides students with basic business skills as well as the accounting knowledge needed to pass the Certified Public Accounting (CPA) exam. Graduates of this program have a very high CPA pass rate and are employed in a variety of areas such as: accounting firms, businesses, medical and non-profit organizations.

Accounting is the one degree with 360 degrees of possibilities. Every business needs accounting help, whether it's a Wall Street law firm, a professional sports team, movie production company, or a rock band. With the proper accounting education, your employment options are endless.

The Accounting Information Technology concentration provides students with basic business skills, the accounting knowledge needed for various professional certifications, and the information system knowledge necessary to design and maintain accounting information systems. Most graduates will have job offers months before they graduate.
