

2014-2015 PETITION/PROGRAM SHEET
Award: Technical Certificate
Program of Study: Sustainability Practices

About This Certificate . . .

“Sustainability” is a way of living that meets the needs of the present without compromising the ability of future generations to meet their own needs. In order to achieve sustainability, we must examine our approach to energy, food, shelter, transportation, and other aspects of everyday life. Can we continue our current approach indefinitely? What changes need to occur to make our approach sustainable? What can we do to make those changes?

Through the Certificate in Sustainability Practices, students learn the principles of sustainability along with specific ways to implement them. Anyone seeking to understand and practice this approach will benefit from completion of the program. For some, the program can serve as a first step toward a more in-depth knowledge that may lead to a career. This certificate could help professionals distinguish their business practices, community leaders better understand future trends in community planning, and any student, educator or citizen wanting to make a positive difference in the environment.
