

March 13, 2020

Dear WCCC Students,

WCCC is part of the CMU family and we are sharing resources, information and responses to the COVID19 pandemic.

You all received a communication from CMU Vice President for Student Services John Marshall earlier this week. You will receive additional communication from him in the coming days and weeks. These future updates will include new information about COVID19 as well as ongoing instruction related to online classes that will occur after spring break.

WCCC is very much a hands-on learning environment. As a result, we have a number of programs that will take a unique and individualized approach to moving online. For these programs, classroom instruction will move online just as all other courses at CMU and WCCC will. However, for the programs below please work directly with your instructor to learn about how these classes will be modified to allow the in person requirements to occur while maximizing the social distancing that is the purpose of moving classes online.

Be safe during spring break and please monitor the CMU-COVID webpage for the most recent campus information and announcements. As we make this transition buildings and computer labs will remain open for students use.

Courses with unique programming needs

Aviation Program

All flight instruction (instrument, commercial, and flight instructor)
