

Accounting

Accounting is often referred to as the “language of business” because it is used to record, maintain, and communicate a company’s financial information. Accountants must develop and apply skills in auditing, taxation, management policy, information systems, and computer operations.

A degree in accounting can enable you to work in a wide variety of industries. Every business needs accounting help, whether it's a Wall Street law firm, a professional sports team, movie Production Company, or a rock band. With the proper accounting education, your employment options are limitless. The [Public Accounting](#) degree at Colorado Mesa University provides you with basic business skills and the accounting knowledge for various professional certificates, as well as the information system knowledge necessary to design and maintain accounting information systems. The accounting program also offers the option of a five year (3 + 2) program which allows students to graduate with a Bachelor of Science in Accounting and an MBA. This program meets CPA certification requirements in all states.

A person in this career may:

- Prepare, maintain, and analyze accounting records and statements including journal entries, balance sheets, schedules, ledgers, and account and bank reconciliations.
- Perform auditing, bookkeeping, and budgeting.
- Advise clients on compensation, employee benefits, and accounting or data processing systems.
- Assist clients in tax preparation and/or estate planning.
- Provide advice on cash flow, profit and loss, and financial management using forecasts and business plans.
- Maintain, coordinate, and/or oversee payroll administration.
- Establish and coordinate accounting control procedures.
