

Business Energy Management/Landman

Energy management/Landman professionals provide business services for natural resource companies; principally gas and oil. They work with landowners to acquire or obtain the rights to use land for energy needs. They often conduct research to determine who actually owns the land and negotiate contracts among land owners, government agencies, and/or companies to enable energy production, transport, and sale to the public.

As the energy industry evolves, you can play a part in the search for pioneering solutions to global energy challenges. With the

[Landman/Energy Management](#) program at Colorado Mesa University, you'll be poised for success in the business side of the growing energy industry with diverse job opportunities that can take you around the globe or keep you at home in Western Colorado. At Colorado Mesa, you'll benefit from a dynamic, interdisciplinary curriculum taught by expert faculty and industry leaders. You'll have opportunities to network with guest speakers who are at the forefront of the industry, access site and facility tours that are second to none, and internship opportunities with global companies based in our region.
