ACADEMIC PROCESSION AND REGALIA

The academic regalia and processional of the ceremony are tied to ancient tradition. The ceremony marks a beginning for the new professional.

In the United States, the great majority of the academic regalia are in accordance with the general provisions of the Intercollegiate Code of 1895. Under the code, bachelor's gowns are made with pointed sleeves; master's gowns are made with long closed sleeves with an arc near the bottom; doctoral gowns are made with round open sleeves. Usually gowns are black, although some American and many foreign universities use colors.

Bachelor's and master's gowns are untrimmed. Doctoral gowns are faced down the front with velvet bars across the sleeves. The velvet facing and bars may be black or they may be the color of the field of study.

Academic hoods date to the 12th century and were used to cover the head and shoulders. The colors of the lining indicate the institution granting the degree. The velvet trim indicates the major field of study or, in some cases, the type of degree held.

The black mortarboard is standard in the U.S. It was originally developed from a skullcap worn by the clergy in cold weather to protect their tonsured heads. The skullcap evolved into a pointed top, which later became a tassel.

The first academic degree recorded was conferred by the University of Bologna at a commencement ceremony in the twelfth century. The practice of conferring degrees spread from there to the rest of the world. The first ceremony in the U.S. was held at Harvard College in 1642.

CHAIN OF OFFICE

The Chain of Office, used by colleges and universities as a symbol of the power of self-governance and academic freedom, has been an element in the ceremonial traditions of colleges since the Middle Ages.

The seven medieval curriculum symbols inscribed on the CMU Chain of Office

The Colorado Mesa University President's Chain of Office is forged in sterling silver with symbolic elements in solid gold. Rectangular links bearing the names and inaugural years of the chief executive officers of the institution are interspersed with gold links representing the seven arts of the medieval curriculum.

The chain supports the "Uncompahgre Medallion," with its replicas of a dinosaur tooth and a prehistoric Native American projectile point cast in gold. The seal is surmounted by three amethyst gemstones. The original dinosaur tooth, projectile point and amethyst were collected on the nearby Uncompahgre Plateau.

The seal on the Chain of Office bears an image of Independence Monument, a prominent geologic feature of the Uncompahgre Plateau. This image, which forms the sigilla of the seal, was derived from a medal fashioned by John G. Henson, CMU Professor Emeritus of Mathematics.

MACE

The mace, used by colleges and universities in the United States, has an ancient history as a symbol of authority. At Colorado Mesa University, the mace is carried by the Faculty Senate President.

The current mace was designed by CMU alum Zachary Frank Villamaria and debuted at the Investiture Ceremony of President John Marshall in 2021.
