Educational History:

- M.S. March 2005; Nova Southeastern University, Ft. Lauderdale, Florida 33329;
Computer Information Systems
- Ph.D. August 1999; University of New Mexico, Albuquerque, New Mexico 87131;
Applied Mathematics; Dissertation: “A Mathematical Analysis of Induced
Defenses in a Plant-Herbivore System,” Advisor: Dr. Deborah Sulky
- M.A. August 1991; University of New Mexico, Albuquerque, New Mexico 87131;
Applied Mathematics
- B.A. April 1988; Fort Lewis College, Durango, Colorado 81302;
Major: Mathematics; Minor: Computer Science Advisor: Dr. Richard Gibbs

Employment History:

- Professor: 2010 – present; Department of Business, Computer Information
Systems, Colorado Mesa University (formally Mesa State College),
Grand Junction, Colorado 81501
- Associate Professor: 2005 – 2010; Department of Business, Computer Information
Systems, Mesa State College, Grand Junction, Colorado 81501
- Associate Professor and Chair: 2003-2005; Department of Mathematics and Computer
Science, Department of Business, Sul Ross State University, Alpine, Texas 79832
and Universidad Autónoma de Chihuahua, Chihuahua, Mexico
- Assistant Professor: 1999-2003; Department of Mathematics and Computer Science;
Sul Ross State University, Alpine, Texas 79832
- Assistant Professor: 1998-1999; Department of Mathematics and Computer Science;
Pacific University, Forest Grove, Oregon 97116
- Faculty: 1994-1999; Department of Continuing Education; University of New Mexico,
Albuquerque, New Mexico 87131
- Teaching Assistant: 1988-94 and 1997-98 Department of Mathematics and Statistics;
University of New Mexico, Albuquerque, New Mexico 87131

Adjunct Faculty: 1994-1997; Southwestern Indian Polytechnic Institute, Albuquerque, New Mexico 87121

Part-Time Instructor: 1994-1997; Department of Mathematics and Statistics, University of New Mexico, Albuquerque, New Mexico 87131

Graduate Assistant: 1994-1996; Minority Engineering Programs, College of Engineering; University of New Mexico, Albuquerque, New Mexico 87131

Consulting Activities:

- Spreadsheet construction to enable project tracking for Genesis Designs Architecture and Planning (2006)
- Faculty/Staff Training and Change Management for the Office 2007 deployment at Mesa State College (2009)
- Mathematical model development and data analysis for Geovic mining company (2009)
- Web site design and construction for JF Strothman Distillery (2012)
- Spreadsheet construction to evaluate effective/ineffective football defensive strategies for the CMU football team (2014)
- Sales force pricing model and spreadsheet construction for Colorado Custom Elevator and Lift (2015)
- Resource Speaker for Tableau Training, Cebu Normal University (2019)

Other Employment:

From 1977 to 1988 positions included retail sales person, ski rental and repair shop employee and manager, ski lift operator and ski patrol, warehouse (shipping/receiving), construction trades and remodel work, restaurant and kitchen work.

Other Teaching Activities	
University of New Mexico, Department of Mathematics and the Office of the Provost 1990-1991	New Mexico Junior Mathematics Prognosis Exam Project (JUMP) – A statewide outreach program geared to increase success in high school mathematics programs.
University of New Mexico, Minority Engineering, Mathematics and Science Project 1994-1995	A tutoring/mentoring program designed to increase participation and success of underrepresented populations in the study of engineering disciplines.
University of New Mexico, Native American Program, College of Engineering 1994-1995	A resident program for Native Americans geared to increase participation and success of the student in the classroom.
Southern Pueblo Agency 1994-1995	A teaching initiative striving to certify Native American teachers who would then return to their pueblos to accept teaching positions in tribal schools.
Phillips Academy Andover, Massachusetts 1995	A residential program for students to increase their knowledge base for study in US institutions of higher education.
Sul Ross State University 1999-2004	PASS (Program for Academic Success and Socialization) A bridge program for first generation college students. This course taught skills and techniques necessary for students to thrive in the University.
Colorado Mesa University 2005 – present	As the faculty advisor to the student chapter of the AITP, I plan and conduct monthly meetings, recruit and train students to staff our fundraising activities, Computer Heroes (a computer hardware and software repair shop) and MSDNAA software provision for students in qualifying classes. I also

	mentor and train students to compete in the AITP's National Collegiate Conference.
Colorado Mesa University 2017 - present	FYI – Freshman Year Initiative Instructor for incoming freshmen on “how to survive” in the university. Topics include study skills and habits, time and money management, learning styles, career options, ethics in the academy, degree options, and independent living.
University of the Philippines Lahug, Cebu City, Cebu Fall 2017	While on sabbatical, I taught a course in Data Analytics (MGT 197) to 38 fourth year (senior) management students. This was a challenging assignment, as the economic situation in the Philippines necessitated teaching without a textbook, so I used online resources as well as lecture notes, examples, and PowerPoints.
University of Cebu, Cebu City, Philippines Fall, 2017	Evaluator for PhD candidates at this 60,000+ student institution. A panel of three evaluators scored the presentations of six PhD candidates after they presented their dissertation research.
Mindanao State University Bolton, Davao City, Philippines January, 2019	Delivered two invited lectures to student groups of business majors. This lecture discussed the current state of data analytics in business and the emerging tools and methods for data analysis.
Cebu Normal University, Cebu City, Philippines July, 2019	Delivered a three-day seminar on the use of Talbeau, a data visualization tool, to faculty from the Institute of Applied Mathematics and Physics. This workshop was intended to stimulate research and grant writing activities within the Institute, as well as the university.

Administration, Curricular Development:

Co-organizer for the New Mexico JUMP (JUNior Mathematics Prognosis) Project:

This was a project which promoted mathematics awareness in public school systems throughout New Mexico. During the time of my involvement the exams were updated, the grading and reporting process was computerized using Scantron forms and Scanform software, and teacher suggestions were incorporated into the examination and reporting processes, as well as into the statistical analysis. Throughout my involvement with this program, many of the teachers in the Albuquerque area invited me to give lectures about the applications of mathematics to their classes which helped them illustrate the importance of mathematics to their students. (1990-92)

Mathematics instructor for the TRIBES Summer Program, Native American Program College of Engineering (NAPCOE):

This was a bridge program for Native American students from throughout North America. As the mathematics instructor I was responsible for curriculum development and implementation. As a part of the program staff, I helped organize activities and set standards for the students. I acted as a mentor to the students, and attended training sessions such as "Imaginal Education for Mathematics and Science Educators," and "Facilitation Methods." (1994)

Mathematics instructor at Phillips Academy in Andover, Massachusetts:

During this summer program, I supervised a male dormitory, taught a physical education class and developed and instructed a class in Mathematical Modeling. Topics covered included dimensional analysis, traffic flow problems, the mathematics of pool, fractals, and population mathematics from both a discrete and a continuous perspective. (1995)

Distance Education Curriculum Development, University of New Mexico:

I was involved with the Department of Continuing Education at the University of New Mexico revising the course curriculum for correspondence classes. This project involved putting together a syllabus for students around the state (and elsewhere) to follow. These syllabi include homework assignments, practice exams, and an outline for

success in correspondence coursework. The course sequences that I revised, developed, and supervised were the algebra sequence (M120, M121, and M150), the elementary education sequence (M111, M112, and M215), and the calculus for life and economic sciences (M180 and M181). (1996-1999)

Curriculum Development at Pacific University:

In conjunction with departmental members, I helped to re-write the mathematics curriculum at Pacific University. One of my primary roles was to develop an applied course in partial differential equations which was accepted as a service course by the physics, chemistry, mathematics and computer science departments at Pacific University. (1998-99)

Course development at Sul Ross State University:

I developed both service courses and courses for math majors that were incorporated into the permanent curriculum. These included Statistics (Math 1342), Numerical Analysis (Math 3306), Computing in Mathematics (Math 3306) and a year-long sequence in Complex Variables (Math 4360 and Math 4361). (1999-2002)

Mathematics Instructor for the PASS (Program for Academic Success and Socialization) Program at Sul Ross State University:

I taught a two week course every summer to students who had just graduated high school and were enrolling in Sul Ross State University for the fall semester. This was a “bridge” program designed to give these students (primarily first generation college students) an advantage to ensure their success in university studies. We reviewed the basics of algebra and geometry as well as introducing good study habits which included note taking and textbook marking. For some of the students, this was a primer for college algebra or statistics, while for others it is a review for the TASP exam, an examination administered by the state of Texas for entrance into university studies. In addition to the mathematics, we had some fun with scavenger hunts and jeopardy; all having a mathematical or scientific orientation. (1999 - 2004)

Mathematics Instructor for the Upward Bound program at Sul Ross State University:

I taught a summer program to junior and senior high school students who were active in the Upward Bound Program. Topics included soil composition analysis, Voronoi diagrams and regions of influence, graph theory, and geometry. (2000)

Distance Education at Sul Ross State University:

I taught classes that were televised to area high schools for dual credit (high school credit and university credit). Typically I taught college algebra or calculus each academic year. (1999 – 2005)

Curriculum Development at Sul Ross State University:

I was a key committee member for the development of a BBA degree in Computer Information Systems (CIS). This committee established curriculum requirements and financial need analysis for the new degree. (2001)

I organized and ran the computer science and mathematics department seminar. In this forum, faculty and students presented ideas from mathematics and computer science that they found interesting. One of the main focal points of the department was the training of pre-service teachers, so this forum provided a chance for the students to “get their feet wet” via presentations in this “safe” environment. Each student enrolled in the seminar was required to present two, twenty minute talks during the semester. (2001 - 2005)

I developed the CIS degree program, insuring that prerequisite classes were taught in a timely manner, obtained and maintained the computer hardware and software infrastructure, directed library acquisitions and advised CIS majors. (2003 – 2005)

Chairman Department of Computer Science and Mathematics:

As the Chair of the department, I was responsible for the oversight of the annual budget, the coordination of class offerings, and the supervision of five faculty, multiple adjunct faculty, and one staff member. Additional duties included aligning our curriculum with the Academic Center for Excellence (remediation programs), working on the English Language Learners Grant in conjunction with the department of Education, and coordinating the mathematics program to align with statewide educator standards.

Faculty Advisor, Colorado Mesa University Association of Information Technology Professionals (AITP) Student Chapter:

As the faculty advisor, it is my job to generate synergy within the organization. This has been accomplished by making the National Collegiate Convention (NCC) a “target point” for the academic year. This focus enables the monthly meetings to have a theme such as “usability analysis” or “PC troubleshooting” as a fun and educational interlude to the regular agenda items. The student chapter began a computer diagnosis and repair fundraising activity, “The Computer Heroes.” This activity gives students PC trouble shooting skills, customer relationship skills, and user support skills. This activity also enables the students to gain practical experience while they pursue their degrees, building their resumes. These activities have resulted in many of the AITP student chapter members participating in NCC events and bringing awards (as well as having a valuable learning experience) to Colorado Mesa University. These activities have also facilitated student presentations in the “Student Scholars Symposium” at Colorado Mesa University, presentations to the sponsoring chapter, the Mile High Chapter of the AITP in Denver, Colorado, and presentations at the National Collegiate Conference sponsored by the AITP. As an interface with our parent chapter in Denver, I travel with students approximately once per semester to a monthly meeting of the AITP in Denver which gives the students exposure to working professionals in the IT field, allows the students to practice networking within the professional field, and gives the students ideas as to what the IT community values in “new employees” before they graduate and pursue careers. (2005 – present)

Distance Education, Colorado Mesa University:

As a regional service provider, Colorado Mesa University has a need for professors to accommodate distance students. I teach classes using WebCT for online

classes and distance delivery methods (two way interactive television) for our remote campus students in Montrose, Colorado. (2006 – present)

Portal Launch/Web Content Redesign, Colorado Mesa University:

As a committee member for the Luminis Portal and the Web Content committees my academic affiliation (computer information systems) was utilized to format the portal pages for both usability and content. Further, my expertise was useful for the redesign of the business department web pages, which I was responsible for. In addition to the design component for my department, I consulted with various other departments for their design and acted as a change manager for the faculty contingent in the adoption of the portal and the web redesign. This committee met during the summer of 2007 to accomplish the roll-out by the fall semester of 2007. (2007 – 2009)

Faculty and Staff Training, Office 2007, Colorado Mesa University:

I was asked to perform training on the new office software package immediately after a campus-wide conversion to Office 2007 by the Office of the Vice-President of Academic Affairs. Incorporated into this training was an element of “change management,” as many on the faculty and staff were leery of the transition. I ran two different training sessions, one for staff where tools such as mail merge and basic formula creation were addressed (Word and Excel) and one for faculty where creation of an automated table of contents, citation and reference list creation, creation of a grade book application, and presentation skills/tools were addressed (Word, Excel, and PowerPoint). The change management came about by informing the users as to the reasons behind the changed interface, its usability and its utility for their job performance. In addition, many of the new customization tools, the help menu, and online help resources were addressed. (Summer and Fall, 2008)

Graduate (MBA) Admissions Working Group, University of the Philippines, Cebu City

As a member of this working group, we formulated admissions standards, tests, and interviews in an attempt to stem the attrition from the MBA program (most attrition is attributed to job and family changes). In doing so, the working group hopes to accept candidates into the MBA program who will stay until completion of their degree. (Fall, 2017)

Curriculum Development at University of the Philippines, Cebu City

I was asked to develop and deliver a course on data analytics to the fourth year students in the management program. This course consisted of utilizing real-world data sets to illustrate how tools such as Excel, the data analytics add-in in Excel, and PHStat can be used to gain business insight and information from raw data. The class was run utilizing web-based resources. (Fall, 2017)
