

## Class Progress

The Class Progress tool tracks your learners' overall progress as a course and individually.

You may want to use the Class Progress tool to do any of the following:

- Monitor progress for any or all users in your course
- Prepare progress reports
- View user profiles, email users, or instant message users
- Track when a user accesses the course and downloads course content
- Track a user's grades, completion of learning objectives, access of content topics, participation in discussions, assignment submissions, quiz submissions, checklist completion, survey responses, login history, and system access.
- Set up intelligent Agents for learners who are falling behind in a course
- View feedback and submissions for assignments, discussion topics, and other assessments for individual learners

## An Overview of Class Progress

1. From the navbar, click **Class Progress**.

2. You can filter class participants based on membership in groups or sections.

The screenshot shows the 'Class Progress' page in Brightspace. The 'Filter to' dropdown menu is open, showing options: 'All Users', 'Groups', 'Group 1', and 'Group 2'. The main table displays progress for various users, including 'jrosenbaum 700471205' and 'demo.student'. The table columns are 'Content Completed', 'Objectives', 'Logins', and 'Grades'.

Name	Content Completed	Objectives	Logins	Grades
groups	0% Completed: 0 / 26	No objectives	Logins: 20	F
Group 1	0% Completed: 0 / 26	No objectives	Logins: 29	No grades
jrosenbaum 700471205	0% Completed: 0 / 53	No objectives	No logins	C
Student, Demo demo.student	0% Completed: 0 / 26	No objectives	No logins	No grades

3. Use the Class Progress navbar to sort the order in which users appear in the chart. By default, the following performance indicators appear from left to right in the navbar: **Content Completed, Objectives, Logins, and Grades**. A maximum of 4 performance indicators can display at any time on the Class Progress page. Available indicators include: **Content Completed, Objectives, Assignment Submissions, Grades, Checklist Completion, Content Visited, Discussion Participation, Login History, Predicted Grade** (for Student Success System users only), **Quiz Performance, Survey completion, and System Access**.

Note the following:

- **Login History** indicates when the learner logged into Brightspace Learning Environment, not the course. However, if the Brightspace Data Platform is enabled, **Course Logins** displays in each learner's User Progress report, which reports on when they accessed the course.
- **System Access** indicates each time the learner accesses Brightspace Learning Environment using a browser, or launches the Pulse app. System access begins when the user logs in, launches the app, or returns after 30 minutes of inactivity. It ends after 30 minutes of inactivity.

- **Absent period** indicates the number of days since the learner last logged into Brightspace Learning Environment. For example, if "Oct 30, 3017 - absent period: 3" displays, the learner did not log in for 3 days, and an Oct 26 login displays below the Oct 30 login.
4. All course participants appear in the chart. Their name, username, and Org Defined ID display alongside their profile picture, if supplied. Their performance results for the listed indicators also display in the chart. Clicking on any area of this chart brings you to the individual user's User Progress page.
  5. To adjust which performance indicators are displayed and which order they are displayed in, click **Settings**. You can also search for users by typing in the **Search users** field.

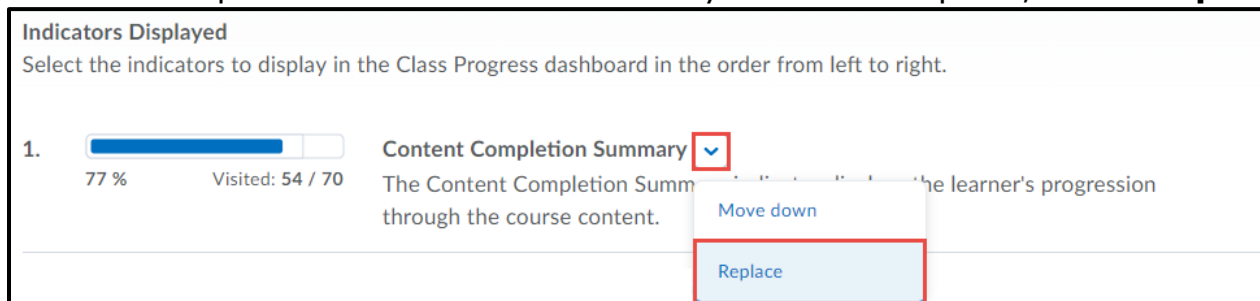

## Change Class Progress settings

You can remove or change progress indicators that appear in the summary report.

1. On the **Class Progress** page, click **Settings**.

2. From the drop down menu of the indicator you want to replace, select **Replace**.

- In the **Select Progress Indicator** dialog box, click on the progress indicator that you want to use as a replacement.

Select Progress Indicator

Select one of the following indicators to replace Login History ( Last 30 days ).

78 %

**Assignments Performance Summary**

The Assignments Performance Summary indicates the current average on all submission folders as well as a visualization of the scores of the last 15 items. Hover over each bar for additional details about the folders.

78 %    Completed: 62 / 80

**Checklist Completion Summary**

The Checklist Completion Summary indicator displays how the learner is progressing through the assigned course checklists. Highlighted items indicate items that are due within the next 7 days.

- To replace more progress indicators, repeat the previous steps.
- To rearrange the order in which a progress indicator appears in Class Progress, select **Move Up** or **Move Down** from the drop down menu of the appropriate progress indicator.

2.  **Objectives Completion Summary** v

Completed: 5/8    The Objectives Completion Summary displays the progression through the assigned objectives for each student's course.

Move down

## Tracking the time spent viewing content

Due to multiple browser configurations and use cases, tracking the time spent viewing content in Brightspace is a best estimate. For example, the following can contribute to inaccurate time tracking: running an aggressive ad-blocker, opening content in another browser tab, downloading the content/viewing it locally, or losing an internet connection while viewing content in a browser.

Tracking the time spent viewing content is useful as a diagnostic tool for an instructor to start a conversation with a learner; however, D2L does not recommend using it as an assessment tool. Consider the following example as a best practice for using time tracking as a diagnostic tool: A learner asks for help with a certain piece of content, and

the instructor notices that the learner only viewed the content for 30 seconds. The instructor then advises the learner to review the content and come back with more specific questions about the parts of the content that were difficult to understand.
