

## Peer Reviews and Viewing Feedback

If your instructor has enabled Peer Reviews in Bongo, you will have the option to review other students' submissions.

## Viewing Peer Submissions

The default setting is to allow peer review only **after** you complete the assignment. After your submission, peer review will be at the top of the assignment window.

1. Locate and click the correct Video Assignment link in **Content** within your D2L course shell.

Or navigate to **Assessments > Video Assignments > your video**

2. When peer assignments are ready for you to review, they will appear above your own submission in the video assignment window.

3. If the assignment requires a specific number of peer reviews, you will see the number of required reviews and the total number of reviews completed in **Peer Review** section.
4. Select the **Peer** dropdown menu to switch between peer submissions.
5. Click the **play button** to view the submission.

## Commenting on Submissions

1. To add a **text** comment, click into the text box to the right of the video and start typing.
2. To submit the text comment, click the **Send icon**.
3. To record a **video** comment, click on the **webcam** icon by the comment area. The maximum recording time is 15 minutes. You will follow the same process for recording your comment as you did when you recorded your submission.
4. After you have viewed or commented on a peer submission, a checkmark will appear and the **Viewed Submission** and **Commented** status bars will turn blue. (If your instructor added a five-star option, you will also see a checkmark by the **Evaluated** status bar. Once you provide a 1-5 star review.)

5. The **Reviewed** progress bar will also indicate a completed review.

6. Select the **Peer** dropdown menu to review additional peer submissions.

7. If a submission has already been reviewed, the student name will appear in green.

## Viewing Feedback on Your Submission

1. At the bottom of the page, you can view feedback left on your submission from peers and instructors.

2. While you play your video, time-stamped comments will appear.

3. Your final grade from your instructor will appear at the top left of the submission screen.
