Project Newsletter
Phase III of Garfield Hall

What's Coming Up?

Crews will continue to work on these projects for the next month. Landscaping began the week of April 24. The project is expected to be substantially completed by the last week of May.

The geothermal loop system has been extended to the rugby field and after semester has ended, crews will connect it to the main campus loop.

Access to Resident Parking

Parking Lot RH28 lost a number of parking spaces to the construction zone, but there should be adequate parking to compensate for those spaces in RH3, RH4, RH6, RH18 and RH24. CMU will also be adding additional parking lots throughout the spring semester.

Who Should I Call with Questions?

Merlin Schreiner
Asset Engineering Limited
(970)260-6875

Kent W. Marsh, P.E.
Director of Facilities Services
Colorado Mesa University
(970)248-1303

Thank You

Colorado Mesa University appreciates your patience during construction.

Progress Report

Construction crews have completed the drywalling and painting in the interior. They are working on installing lighting fixtures, plumbing fixtures and heating/ventilating trim. Floor covering and tile work is also underway.

In addition, crews are working on installing door hardware and hanging the interior doors. They have also started the cabinetry work and installing the elevator.

Outside of the building, crews are working on finishing the masonry. Storefront glass installation is in progress, and crews are working on the exterior concrete and retaining walls.
