

GirlsDoMath

Summer Enrichment Camp

Do you love working on challenging math problems? Would you like to meet other girls and women who also love math? If you answered yes to these questions, then the GirlsDoMath Camp may be the perfect place for you!

GirlsDoMath Camp is a four-day, mathematics enrichment camp for girls entering 8th or 9th grade. Participants will investigate advanced mathematics topics that are not typically included in a traditional curriculum. This year's theme is knot theory. Theme-related topics will be introduced using hands-on activities and further explored through a research component.

GIRLS $\xrightarrow{\text{Do}}$ **Math**

July 7-10, 2025

11:30am - 4:00pm

Colorado Mesa University

All girls who love math and are entering 8th or 9th grade in the fall are invited to apply.

Participants will work with female math professors and university students to investigate fun enrichment topics in mathematics.
