

GirlsDoMath

Summer Enrichment Camp

Do you love working on challenging math problems? Do you want to learn about careers that require a strong math background? Would you like to meet other women who also love math? If you answered yes to these questions, then the GirlsDoMath Camp may be the perfect place for you!

The GirlsDoMath Camp will be a week-long, mathematics enrichment camp for girls entering 8th or 9th grade. During the camp, participants will investigate exciting topics in mathematics (such as 'Fractals' or 'Combinatorics') that are not typically included in a traditional curriculum. The topics will be introduced using hands-on activities and further explored through research components. Participants will also learn about contributions of women to the field of mathematics as well as some of the many possible math-related careers.

COLORADO MESA
UNIVERSITY

June 13-17, 2022

9:00am - 4:00pm

Colorado Mesa University

All girls who love math and are entering 8th or 9th grade in the fall are invited to apply.

Participants will work with female math professors, teachers and university students to investigate fun enrichment topics in mathematics.

How to Apply: The GirlsDoMath application is available online at the camp website.

Admission is competitive and will be based on application materials.

Application deadline:

May 27, 2022 for full consideration. After this date, applications will be considered if space is available.

Cost: The camp is supported by a grant so there is no cost to girls who are accepted to the camp.
