You should see a new D2L Shell called  
“Córdoba 2026”

## D2L Shell

# Multi factor authenticator

- “Each faculty member and student, who is associated with CMU, will need to setup Microsoft Authenticator on their smartphone as the default MFA authentication method prior to leaving the US. The easiest way to accomplish this is to have each person come to the Technology Help Desk, located on the first floor of the Library, so they can work with our staff to get this setup properly. Please encourage your student to address this well before they leave so it doesn’t become an unplanned emergency.”

# Telephones

- Check with your provider
  - Or
- Get them unlocked!
  - eSims (orange, holafly, etc.)
