Guidelines for Continuing into Internship

Every attempt is made to assist teacher candidates in their pre-intern semester. However, there are some program requirements that, if not met, may lead to teacher candidates not continuing into their internship semesters.

- Students must earn a B or better in their methods courses. Teacher candidates may not continue if they have not passed all of their methods courses.
- Students must maintain the required overall and content area GPA of 2.8 to continue in their programs.
- Students must take and pass the Praxis II for their content area. Students know from the onset of their programs that they must pass the Praxis II before beginning their internship (second semester). Students can sign up and take this exam at any time during their teaching program. CMU encourages the students to take this exam early so that in the event they do not pass, they have enough time to study and retake the exam.
- Students are monitored by university supervisors, instructors, mentor teachers, and program coordinators during their program for professional dispositions. These are professional attributes necessary to be a successful educator: attendance, attitude, writing skills, oral communication, collaboration, content knowledge, professional interactions. In the event that a teacher candidate receives three unsatisfactory dispositional evaluations, students will be removed from their placements.
- Students receiving documentation of less than satisfactory progress in their pre-internship semester by their mentor, university supervisor, and/or program coordinator may be removed from their pre-internship semester.
- Students must have a valid CPR/First Aid card before beginning their internship semester. All education students are made aware of this requirement at the onset of their programs.
- Students may need to complete a follow-up background check prior to student teaching.
- Students may choose to withdraw, timeout, or take a semester off.

Again, every effort is made to assist teacher candidates in the critical transition from pre-internship to internship. However, the above-mentioned requirements/situations are possible reasons why teacher candidates may not advance into their internship semester.
