
Costume Fittings

Adapted from IATSE Stagecraft Safety Committee Recovery Plan (Wardrobe and Fittings) p. 26 and p. 12 (Disinfection and Maintenance)

- Costumes will be separately bagged on storage and repair racks prior to coming to the actor.
- Fittings will be scheduled with 30 minutes between them so as to allow surface disinfection and air exchange of space.
- Whenever possible, contact time will be limited to 15 minutes.
- Actors/Wardrobe Personnel will wash or disinfect hands directly prior to fitting
- Actor/Wardrobe Personnel will wear masks at all times.
- Actor will dress alone in the fitting room (unless assistance is required) and step out into a designated open space for the duration of the fitting contact time. Such Designated Space will be arranged as necessary to preserve privacy.
- Only essential personnel should be present in the fitting area. ie. Costume Designer and Shop Manager
- Tools that come in contact with the actor, such as measuring tapes will be sanitized after each fitting. Measuring tapes will be sanitized with wipes. Pins will go into an alcohol bath.
- Unused costumes will be returned to a designated rack, kept separate from other clothing to quarantine for a minimum of 48 hours or be laundered before return to stock.
- Costumes that cannot be cleaned will be quarantined for 48 hours on a separate rack and not brought into contact with other costumes.
