

Aaron Kimple

Program Director, Forest Health for Mountain Studies Institute,
Durango, Colorado

Program Coordinator for San Juan Headwaters Forest Health
Partnership

Program Coordinator for the Two Watersheds, Three Rivers, Two
States Cohesive Strategy Partnership (2-3-2)

*Develops and manages programs, organizes community involvement in
mountain science.*

Aaron manages programs and organizes community involvement to address resource management concerns. He has worked with a spectrum of community interests and management agencies to promote adaptive management practices on a landscape scale. He coordinates that San Juan Headwaters Forest Health Partnership in Archuleta County, Colorado and the Two Watersheds-Three Rivers-Two States Cohesive Strategy partnership, a collaborative effort working to address forest health issues within the San Juan and Rio Grande Watersheds, across the Colorado-New Mexico Border.

Aaron has a Bachelors Degree from Earlham College in Richmond, Indiana. A MS from Bard College. His thesis explored the Spatial Patterns of Hemlock Woolly Adelgid Damage and Impacts on Tree Physiology and Water Use in the Black Rock Forest, Southern New York.
