

Annual Student Water Field Conference

“What makes a Watershed Healthy?”

Winter Park, Colorado

September 20th-22nd

**Speakers from:
Trout Unlimited
Grand County
The Headwaters Center**

Students will tour the Headwaters Center’s brand-new ecological center, participate in a guided educational hike along the Fraser River, ride the Winter Park gondola to the top of the mountain to witness spectacular watershed views with local environmental professionals, and so much more.

As with every Student Water Field Conference, this is an amazing opportunity for students to engage with their peers from across the state in an open and supportive environment to get curious, and to get answers, about watershed health.

If you’d like to know more, please contact Nona Shipman at nshipman@msudenver.edu or Hannah Holm at hholm@coloradomesa.edu or call 970-248-1968. **Space is limited!**
