

## **Alan Butler**

*Bureau of Reclamation*

Alan Butler is a Hydrologic Engineer with the Bureau of Reclamation's Lower Colorado Region, where he has spent his entire career. His primary responsibilities are the development and enhancement of various Reclamation RiverWare models, which are used to support mid- to long-term planning in the Colorado River Basin. He has provided technical support for the development of Minute 323 to the 1944 treaty with Mexico and the Glen Canyon Dam Long-term Experimental Management Plan EIS. Alan was part of the Colorado River Basin Water Supply and Demand Study technical team where he led the RiverWare modeling efforts for the Study. In the Moving Forward follow up to the Study, he served as the co-chair of the environmental and recreational flows workgroup. Alan holds BS and MS degrees in civil engineering from the University of Colorado – Boulder.
