

Christopher Caskey

Chris is a scientist and entrepreneur who is passionate about energy, water, and sustainable business development. He serves on the board of the Western Slope Conservation Center and manages Delta Brick & Climate Company, a startup he founded to destroy greenhouse gases and produce building materials. Until recently he was a Research Assistant Professor of Chemical and Biological Engineering at Colorado School of Mines, a title that was far too long. Previous posts include startup founder and crasher, scientist at the National Renewable Energy Laboratory, mountaineering guide, and technical consultant. Chris holds a doctorate in applied chemistry and once assisted a man who was being attacked by an octopus.
