

Dagmar Llewellyn

Bureau of Reclamation

Dagmar Llewellyn has served as a hydrologist at the Bureau of Reclamation office in Albuquerque since 2010. At Reclamation, she coordinates projects related to the projection of the impacts of climate change, and to building of resilience to resulting changes in our watersheds and water supply. She provides her expertise to endangered species and other environmental compliance both in the Rio Grande Basin, and in the headwaters of the San Juan Basin, a portion of the Upper Colorado River Basin that provides trans-basin water to the Rio Grande. She also contributes her expertise to research and outreach efforts related to water supply and demand challenges in these basins. Prior to employment at Reclamation, she worked for 22 years at S. S. Papadopoulos & Associates, a firm that specializes in quantitative analysis of groundwater and surface water, in its Washington DC office, and as the manager of the firm's Albuquerque office. She is an adjunct faculty at the University of New Mexico, where she has taught hydrogeology in the Civil Engineering Department, New Mexico Water Management at the Law School, Water Resources Management in the Geography Department, and served on Master's Thesis committees.
