

Quinn Donnelly

River Restoration

Quinn Donnelly is a river engineer with thirteen years of experience on a broad range of water resource projects. For the past five years he has been working on the rivers and streams of the mountain west at RiverRestoration, an engineering consulting firm based out of Carbondale, Colorado. Quinn's areas of expertise include open channel hydraulics, fish and boat passage, fish habitat, recreational whitewater, stream restoration and bank stabilization. He is a registered Professional Engineer in the states of Colorado and Utah and has engineering degrees from the University of Virginia and the University of Washington. Prior to his engineering career, Quinn did stints in the US Air Force and the US Geological Survey.
