

Elizabeth M. Brown

Invasive Species Program Manager, Colorado Parks and Wildlife

Chair, Western Regional Panel on Aquatic Nuisance Species

Elizabeth Brown has been working on invasive species management for twenty years and has served as the Invasive Species Program Manager with Colorado Parks and Wildlife since 2008. Previously, she served as the Stewardship Coordinator for Colorado State Parks and the Early Detection Rapid Response Specialist for the Colorado Noxious Weed Program. Elizabeth's current duties focus on aquatic invasive species, including watercraft inspection and decontamination, sampling, monitoring, education, outreach and policy. Elizabeth is a macrophyte taxonomist and operates a laboratory that provides free identification of aquatic plants, molluscs and crustaceans. Elizabeth also coordinates terrestrial invasive species plant and animal management within Colorado Parks and Wildlife.
