

Bio: Kenneth W. Curtis III

After graduation from the Colorado School of Mines Ken worked 13 years moving around New Mexico constructing heavy-highway civil projects. Ken next settled down to become the City Engineer for booming suburb Rio Rancho New Mexico for eight years. Finally in 2007 he found his calling as the Chief of Engineering and Construction for the Dolores Water Conservancy District in southwest Colorado. Ken leads the District's hydrology and McPhee Reservoir operations on Reclamation's Dolores Project. Ken also oversees major replacement and rehabilitation projects for Dolores Project infrastructure.
