

Zachary P. Dutra

Zachary Dutra is a Masters candidate in the school Environmental Management at Western Colorado University in Gunnison, CO. He is designing a project that uses smart-technology based monitoring systems in agriculture settings to increase water efficiency. In 2013 Zach earned a B.A. in Business Land Management with a minor in Geology from WCU. After spending a few years in the land management field, Zach has returned to WCU to focus on an issue that is both close to home and close to heart: water conservation in the Colorado River Basin.
