

Luke Gingerich

Luke manages J-U-B Engineer's western Colorado area office. He has significant leadership experience and qualifications in the planning and design of water resource projects. He works extensively with government agencies, local, state and federal, as well as many NGOs and private clients on drought planning and project implementation. His experience also includes all phases of irrigation system planning, design and construction. Luke is a leader in agricultural water use on the western slope and currently provides engineering services for multiple irrigation districts and private water rights owners. Luke is a licensed engineer in Colorado, Utah and New Mexico.
