WCCC NON-CREDIT COURSES AND HIGH SCHOOL AND MIDDLE SCHOOL SUMMER CAMPS

SUMMER 2020 LIFELONG LEARNING OFFERINGS

COLORADOMESA.EDU/CEC

SUMMER CAMPS
for middle and high school students at Western Colorado Community College
Greetings from Western Colorado Community College (WCCC) and welcome to the Lifelong Learning and Corporate Education program brought to you by the Community Education Center.

What's inside? Inside this Summer 2020 edition of WCCC's Community Education Center brochure we have a large selection of classes/workshops for personal and professional growth that are designed for lifelong learning around many fun topics. We invite you to experience the fun and excitement of exploring something new or enhancing your existing skills.

What's in it for me? Whether your motivations are for personal enrichment, advanced skill training, or professional development, the Community Education Center at WCCC is here for you. Learning new concepts, skills or hobbies is fun, and meeting others with similar interests can provide lasting friendships. We are committed to providing opportunities for lifelong learning and workplace training in the community we share. Many of the Community Education Center courses are developed from your input and ideas. If you have an idea for a new class or would like to propose teaching a new class for us, let us know and we will happily try to make it happen.

Corporate opportunities/solutions? Local companies have found the Community Education Center to be a great place to find solutions for leadership training needs and safety and compliance responsibilities for their employees. In addition, many of our college technical programs can be leveraged to provide expert customized training for your business using our facilities or yours. Automotive, Welding, Multimedia, 3D Printing, Health Care, Electrical, Machining, Water Quality, Computer Coding and CISCO certifications are only a few of the areas that we can train. If you are a business leader and have specific training requests, let us know and we will find a way to help.

Visit us online, call or stop in today.

Customized Corporate Training & Business Services
Western Colorado Community College offers custom and ongoing classes to help make businesses safer and more profitable. Would you like to get more from your workforce and increase your competitiveness? Training brings direct benefits to you and has an immediate return on investment. Our tailor-made training solutions can rapidly help increase employee performance. Whether you are a small business venture or the community's largest employer, we will work with you to create the best programs and services in the market today. Our goal is to be your training education partner of choice to create positive change.

Conferences & Seminars
Reserve a training room or computer lab for your upcoming meeting, training or workshop. Video conferencing and presentation equipment is available. Catering also available!

At the time of publication, WCCC and CMU intends to host non-credit courses and summer camps scheduled to start June 1 or later, but that may change depending upon guidance from public health officials.
Arts & Crafts

Calligraphy: Beautiful Writing

This class will help you master the art of calligraphy in a manner which will enable you to grow at your own pace. You will surprise yourself with the works you will be creating. Calligraphy is a “Zen” thing, calming and relaxing.

See Materials List online for the supplies to bring to class.

Day: ............................................................... Mondays
Time: ............................................................. 6–8pm

Graphology (Handwriting Analysis)

Graphology is the study of human personality through writing. It is based on the principle that every individual’s handwriting has a character of its own due to the uniqueness of the writer’s personality. This class will have you looking at old letters to find out about that person’s personality and/or character. Wonder why your coworker reacts to things at the office? Suspect someone close to you is hiding something? From forgery to analyzing any letter or signed document, you will enjoy this class full of surprises.

Students will receive a nice spiral workbook and quill pen with the class.

Instructor: ......................................................... Wall

OPPORTUNITIES FOR LIFELONG LEARNING

Business & Leadership

Accomplish What You Say: Improve Communication in the Workplace

Oftentimes, when managers communicate their ideas to employees, what is said and what is accomplished are two radically different things. This course covers a variety of topics to improve communication in the workplace, so that management and employee expectations become clear and your company can work more efficiently toward a common goal.

Instructor: Haggerty
Fee: $99

OPTION 1
Date: July 13
Day: Monday
Time: 1–5pm

OPTION 2
Date: July 16
Day: Thursday
Time: 8am–12pm

Empowering and Engaging Employees

What is empowerment? What is engagement? What is the cost of poor leadership? This course discusses those topics and how you can re-energize yourself and your employees towards higher levels of performance. We will discuss the root causes of conditions such as absenteeism, disgruntled employees, low engagement and turnover, and then discuss how to empower and engage employees to improve performance.

Instructor: Haggerty
Fee: $99

OPTION 1
Date: July 20
Day: Monday
Time: 1–5pm

OPTION 2
Date: July 23
Day: Thursday
Time: 8am–12pm

Facebook and Instagram Marketing for Small Business

Interested in learning more about marketing your product or service on Instagram and Facebook? This class will focus on navigating the tools needed to help boost your sales and online presence. The structure of the class will include group discussion, computer-based and hands-on learning.

Participants should have established Facebook and Instagram business profiles/pages before starting the class.

Date: August 3
Day: Monday
Time: 1–5pm

OPTION 2
Date: August 6
Day: Thursday
Time: 8am–12pm

Managing Yourself

In today's digital world, it is crucial to know yourself and your organization in order to effectively lead and interact with people. This course will explore ways to manage yourself in order to then manage/lead others. We will cover techniques of self-evaluation and learn to recognize and overcome stressors and weaknesses many business leadership experience.

Instructor: Haggerty
Fee: $99

OPTION 1
Date: August 10
Day: Monday
Time: 1–5pm

OPTION 2
Date: August 13
Day: Thursday
Time: 8am–12pm

People Management

Managers are much more effective when their employees believe in them and their leadership. This class will discuss current techniques to help you become an effective people manager. Learn techniques for conflict resolution, how to give constructive feedback, and an effective process for employee evaluations and accountability.

Instructor: Haggerty
Fee: $99

OPTION 1
Date: August 16
Day: Thursday
Time: 8am–12pm

OPTION 2
Date: August 21
Day: Tuesday
Time: 8am–12pm

Preventing Harassment in the Workplace

We all have a moral responsibility to help create and maintain a positive, safe work environment free from discrimination, intimidation, bullying, sexual harassment and retaliation. Bad behavior rarely goes away by itself and, if left unchecked, may lead to more devastating consequences. This course covers general and advised harassment policies; quid pro quo; harassment and workplace conduct utilizing interactive scenarios; and expectations you should have in any work environment, and what should be expected of you.

Instructor: Haggerty
Fee: $99

OPTION 1
Date: July 21
Day: Tuesday
Time: 8am–12pm

OPTION 2
Date: August 17
Day: Tuesday
Time: 8am–12pm

Everyday Artisan Bread

This course is a two-part series where cooks will learn to use a simple, master artisan bread dough recipe that can be used every day in various ways. We will cover both savory and sweet uses of a master dough. This is the perfect course for the home cook who loves simple techniques that creates impressive results. The savory portion of this class will cover a crusty boule, artisan pizzas and garlic knots. For the sweet portion we will cover challah, pastry and cinnamon twists.

Instructor: ............................................................. Skidmore
Fee: ................................................................. $89
Materials Fee: ......................................................... $22

Get to Know Your Air Fryer

Did you get an air fryer and now it is gathering dust in a cabinet? Having a new appliance comes with a learning curve. Let’s figure what fun and delicious foods we can make with this new gadget. Come cook (and have dinner) with me. We will make some crunchy and delicious plant-based food and eat together. Meat cooking methods will also be addressed.

Instructor: ............................................................. Leon
Fee: ................................................................. $49
Materials Fee: ......................................................... $20

Kids in the Kitchen!

Are you trying to eat better, but you feel like you are doing it all alone? Getting your kids in the kitchen helps them find new foods they love and gives them a life skill. When kids cook food, they are more likely to eat it. That gives you a great ally in the kitchen, and in the dining room. Come cook (and have dinner) with me. We will make some simple and delicious plant-based food and eat together. Meat cooking methods will also be addressed.

For kids eight and up with a parent or guardian.

Instructor: ........................................................... Leon
Fee: ...................................................... $139 (per couple)
Materials Fee: ......................................................... $20

Dance

Cha Cha Dance Class

One of the most popular of the social Latin-American dances, the Cha Cha is a fun, flirtatious dance with playful energy. It’s a blend of other Latin dances including the Mambo and Rumba. In this dance class we will cover a variety of different moves, from basic steps to turns, twirls and more! Anyone can attend – beginners, intermediate or advanced. Come join us for this fun, energetic class!

Enology: The Study of Wine

Wine Sensory Analysis

When analyzing wines, professionals split flavors and aromas into three different categories: primary, secondary and tertiary. Primary aromas are those specific to the grape variety itself. Secondary aromas are those derived from fermentation. Tertiary aromas are those that develop through either bottle or oak aging. In this class, students will learn about primary, secondary and tertiary aromatics, and will have the opportunity to calibrate their nose through the use of aroma vial standards. This seminar includes the evaluation of several wines. Must be at least 21 years of age.

Please do not wear perfume, cologne, or any fragrance to this class. It will interfere with the aroma vials and the wine sensory experience.

Fee: ................................................................. $59
Materials Fee: ......................................................... $20

Food and Wine Pairing Principles

The main concept behind food and wine pairings is that certain elements (such as texture and flavor) in both food and wine interact with each other, and thus finding the right combination of these elements will make the entire dining experience more enjoyable. Come learn the basic pairing principles and put them to the test through local wines paired with numerous food tastes. This seminar includes the evaluation of several styles of wine with “small bites”. Must be at least 21 years of age.

Please do not wear perfume, cologne, or any fragrance to this class. It will interfere with the aroma vials and the wine sensory experience.

Essential Oil 101

Essential oils seem to be all the rage. This class will cover the basics of essential oils and how they differ from infused oils. We will also cover what they can be used for and how to use them safely. What about for use in pregnancy or childbirth, for infants and nursing mother, for the elderly or those with sensitive skin? Can essential oils be harmful? Can/should they be taken internally? This class will answer all of these questions and more.

Instructor: ....................................................... Carpenter
Fee: ................................................................. $49

10 ways to Control Emotional Eating: Never Binge Eat Again

Have you ever rushed to the kitchen or gone through a drive-thru because you had a terrible day, an argument or because you were bored? Do you use ‘comfort foods’ to soothe yourself through difficult situations? Does the constant thought of food derail your willpower and make it difficult to lose weight? If you answered yes to any of these questions, this class is for you! Come gain clarity and learn simple, non-food techniques that take willpower and motivation out of the equation, so you will be able to eat what and when you decide to.

Osteoporosis Holistic Prevention and Management

One in four post-menopausal women have osteoporosis (OP). OP is second only to heart disease as a global healthcare problem. Risk of dying from hip fracture (often the first indication of OP) is equal to breast cancer for women over 50 years of age. Yet, eight in ten women deny personal risk, and simple calcium supplementation is not enough to stave off this painful, debilitating and costly disease. In this class, participants will learn risk factors and different theories on prevention and optimizing bone strength and minimizing the loss of bone density with proper nutrition.

Jethro Tull: Sowing Revolution in the Grand Valley

Jethro Tull’s technological and scientific revolution of 1631 essentially remains state of the art today. A story filled with industrial sabotage, international diplomatic incidents and intrigue, rebellion, sedition, piracy and profit, his mechanical and scientific genius allowed anyone to begin a new business for greater financial independence and political freedom. Tull helped shape the American revolution, and sparked the industrial age. Hear his story, read his own words for yourself and you will see their relevance today, here in the grand valley.

Basic Music Theory: Level 3B

This class is a continuation of Basic Music Theory: Level 3A, and will cover major and minor chords, inversions, transposing, harmonizing and composing simple melodies. It is strongly recommended that you take Basic Music Theory: Level 2 and 3A before taking this course, or meet with the instructor to see if this is an appropriate starting place for you.

Instructor: .................................................................................. L. Devereux
Fee: .......................................................................................... $149
Materials Fee: ........................................................... $15 (payable to the instructor on the first day of class, unless previously paid for Basic Music Theory: Level 1 or 2)

Beginning Songwriting

Have you ever wanted to write a song, but have not known how to begin? This course will introduce you to the tools and techniques needed to write songs. Students will learn basic poetic structure and devices, song-form, the correlation of scales and chords, and chord structure and progression.

Instructor:.................................................................................. Nohe
Fee: .......................................................................................... $99

Beginning Ukulele

Come learn to play this fun and quirky instrument. With only four nylon strings, chord shapes and scales are easier to learn, and the strings are gentler on your fingertips. In this class, students will learn to play basic chords and strumming patterns in order to accompany songs in various styles.

Instructor:.................................................................................. Nohe
Fee: .......................................................................................... $99

Improvisation for All Instruments and All State Prep

In this class, students will learn to improvise over blues, rock, country and jazz chord progressions using blues scales, major scales, minor, scales, modal (modes) scales, and altered scales. The material is suitable for all types of instruments, and offers preparation for the All-State Competition.

Instructor: .................................................................................. Nohe
Fee: .......................................................................................... $99

OPTION

Date: ................................................................. July 9, 11, 16, 18, 23, 25, 30, July 2

Online Career Training & Micro Credentials

These programs are developed in collaboration with industry experts, employers and associations, providing students with a course of study that will prepare them to successfully transition to the workplace after graduation. They all can be completed online through an academic partnership with an industry leader in the program.

For more information give us a call at 970.255.2800 or view these programs and get more information through the following website: partner.careerstep.com/wccc.

Computer Technician

This expert-designed program will prepare students to work with hardware, software, networks and security issues. Students will gain the knowledge and skills needed to earn CompTIA A+ certification. Certification exam vouchers are included with the program.

Fee: .............................................................. $1,999

Medical Billing

Medical billing professionals are an integral part of the healthcare industry, as they work directly with insurance companies, healthcare providers and patients to get medical claims processed and paid. This includes managing claim denials and handling appeals if necessary. This online course will prepare students to work in a variety of healthcare facilities.

Fee: .............................................................. $2,999

Medical Transcription Editor

Approved by the Association for Healthcare Documentation Integrity (AHDI), the Medical Transcription Editor program prepares students for medical transcription and editing careers. Topics studied include documentation, biomedical sciences, and editing theory. Enrollment includes eBooks, a transcription foot pedal, an AHDI membership and a voucher to take the RHDS exam.

Fee: .............................................................. $3,199

Pharmacy Technician (ASHP/ACPE) Program

The Pharmacy Technician program prepares students for the Pharmacy Technician Certification Board (PTCB) Exam. The course connects students with an externship partner so they can fulfill graduation requirements. In addition to one-on-one instructor support, students will receive a lab kit, eBooks and an exam voucher.

Fee: .............................................................. $2,999

Professional Medical Coding and Billing

Medical coding and billing professionals translate medical records into standardized codes used to bill patients and third-party payers such as insurance companies and Medicare. This comprehensive Professional Medical Coding and Billing program will provide students with a healthcare knowledge base, and will train you to use all of these codes—CPT, HCPCS, and ICD-10 including an optional PCS procedural code set. Enrollment includes eBooks, codebooks and a certification exam voucher.

Fee: .............................................................. $3,699

Outdoors Recreation

Bicycle Maintenance

In this hands-on class, students will learn several important skills needed for proper bicycle maintenance and repair. Skills learned will include how to repair a tube/tire, gear and brake adjustments and lubrication, chain removal, bearing adjustments, wheel true, and no hydraulic brake over-hauling or shock over-hauling. Students will also learn how to choose the right bike based on size and fit.

Instructor: .......................................................... Brown

Fee: ................................................................. $49

Fly-Fishing: Level 1

This course covers the basics of fly-fishing. You will be introduced to selecting the right equipment, types of fly-fishing, types of flies and their use, knots and the basic cast. This course is designed to get you started with confidence on your journey into the world of fly-fishing. We will be practicing casting even on the first day. Therefore, if you have a rod, reel and line plan to bring it. The instructor will have a few extra sets available for use throughout the course if needed.

Instructor: .......................................................... Barto

Fee: ................................................................ $109
Fly-Fishing: Level 2

This class builds on Fly-fishing: Level 1 or your basic understanding and knowledge of fly-fishing. We will cover the importance of stealth and strategy and types of waters that hold trout, types of trout and their feeding behaviors, and matching the hatch. We will learn new casts and techniques that will help maximize your potential for success. The importance of an understanding of limnology and entomology will be addressed.

Bring a fly rod and reel to the first class if you can.

Instructor: Barto
Fee: $109

Wilderness Navigation Using a Map and Compass

A fun and informative course that will teach you how to navigate the backcountry of Western Colorado with just a map and compass. Unlike GPS, a map & compass work in snow, fog, rain, deep valleys, slot canyons and dense forests and their batteries never die. Topics covered will include: UTM grid system, declination, establishing and following a bearing, coordinate position and triangulation. This class can be useful to anyone who spends time navigating cross-country or for those engaged in Search and Rescue operations. The “final exam” is a field exercise on the last day of class.

Instructor: Barto
Fee: $119

Wilderness Navigation Using GPS

This course is designed for anyone who ventures off the beaten path and intends to rely on a GPS device as a navigational aid. This includes day hikers, single-track enthusiasts, hunters, fishermen, horsemen and even SAR personnel. It is intended as a companion course to Wilderness Navigation Using Map and Compass. This is an in-depth course, not just a quick overview. Proficiency with GPS can add to your enjoyment of the back country. You will have more fun outdoors if you are not afraid of getting lost! The “final exam” is a field exercise on the last day of class. Bring your GPS to the first class if you have one.

Instructor: Barto
Fee: $119

Algebra Without the Math

Algebra is an exquisite philosophy, with profound implications and applications to art, science, business and spirituality. However, it can be challenging to those who experience difficulty with mathematics. Students will learn how to understand, accomplish and apply the essential skills of algebra using pictures, blocks, physical props and other visual aids.

Instructor: Michelson
Fee: $49

AWS Certification Prep Course

For those who are seeking professional certifications from American Welding Society. Safety, procedure and code requirements, practice materials, coaching, and evaluations included. Welding processes: GTAW, GMAW, FCAW, SMAW. Materials: Steel Sheet, Plate, Pipe, Tube, and more. Welder certification testing to follow the course – prices may vary.

Instructor: Calver
Fee: $259

Plant Psychology and Anatomy: The Movement and Thought of Plants

Utilizing simple scientific tools like magnifying glasses, students will undertake observational experiments to observe and understand the “organs” of plants, their sensory perception, and psychological processes, having first learned the history of this exciting field since the earliest research by Tull and Darwin. Students will understand the practical application to bonsai, house plants and agriculture.

Instructor: Michelson
Fee: $49

Online Career Training & Micro Credentials • Outdoor Recreation • Personal Growth
Welding Workshop

For those seeking personal development for home/hobby applications. Safety, equipment troubleshooting, basic applications of GMAW, GTAW, FCAW, SMAW welding processes, and OAC, PAC cutting processes, power tools, coaching, and practice material included.

Instructor: ................................................................. Calver
Fee: ................................................................ $259
Materials Fee: ........................................................... $85
PPE and Locker rental. .............................................. $50 (payable to the instructor if needed)

OPTION
Date: ................................................................. July 6, 7, 8, 9, 10
Day: ................................................................. Monday–Friday
Time: ................................................................. 5–9pm

Portrait Photography

This class is designed to teach basic portraiture: from basic to advanced lighting techniques, both in the studio and on location, posing, proper lens selection and camera settings. We will also discuss the psychology of photographing people. Students should bring their cameras, lenses, flash cards and tripod and lighting equipment, if owned.

Instructor: ................................................................. Davenport
Fee: ................................................................ $259

OPTION
Date: ................................................................. July 13, 15, 17
Day: ................................................................. Monday, Wednesday, Friday
Time: ................................................................. 6–8pm

Basic Digital Photography

This class is for cameras with interchangeable lenses. This class will also teach you about auto and program modes, why your camera shoots different file types and why you would use them. We will talk about some of the menu settings and how you might want to set yours. We will discuss the different auto focus settings your camera may have, why one may be better for you than another. Your questions will be answered as you move forward in the world of digital photography.

Instructor: ................................................................. Davenport
Fee: ................................................................ $99

OPTION
Date: ................................................................. June 9, 11
Day: ................................................................. Tuesday, Thursday
Time: ................................................................. 6–8pm

Digital Photography: Beyond the Basics

This class will take you past the basics of using your digital camera with interchangeable lens. The instructor will spend hands-on time with you explaining menu functions, modes, lighting, lens types, and printing your images. This class is perfect for the person who knows how to take pictures, but wants to go beyond the basics to create images with their digital camera. Be sure your batteries are charged or you have a spare, and you have your owner’s manual. If you do not have a good working knowledge of your camera, please take the class prior to this one.

Instructor: ................................................................. Michelson
Fee: ................................................................ $259

OPTION 1
Date: ................................................................. June 8, 9, 10, 11, 12
Day: ................................................................. Monday–Friday
Time: ................................................................. 5:30–7:30am

OPTION 2
Date: ................................................................. July 11, 18, 25, August 1, 8
Day: ................................................................. Saturday
Time: ................................................................. 9–11am

Grammar Confidence PLUS

Is it who or whom? Do I really need a comma there? These questions continue to vex and confound those who have not had the opportunity to understand how all of those rules and pieces go together. Fortunately, now there is a way to look at the big picture and see how it all fits together in a relatively simple way. Grammar is a mainstay of clear and professional writing. Even in casual situations, using words well makes a good impression on those who read your messages. You owe it to yourself to take a couple of weeks to examine this interesting subject and clarify your understanding, so that you can write with confidence.

Instructor:.......................................................... L. Devereux
Fee:...................................................................... $129
Workbook Fee:.......................... $15 (payable to the instructor on the first night of class)

OPTION
Date: ......................................................... June 29, 30, July 1
Day: ............................................................ Monday, Tuesday, Wednesday
Time: .......................................................... 5:30–7pm

Grammar Artistry

This class is the next step after Grammar Confidence PLUS. We will delve into how to use our knowledge of grammar to arrange our sentences and paragraphs for maximum meaning and effect. We will go into the nuances of effective writing and what role grammar has in aiding this process. We will continue using the workbook from Grammar Confidence PLUS.

PREREQUISITE: Grammar Confidence Plus

Instructor: .......................................................... L. Devereux
Fee: ...................................................................... $129

OPTION
Date: ......................................................... July 22, 23, 29, 30, August 5, 6
Day: ............................................................ Wednesdays, Thursdays
Time: .............................................................  6–8pm

Great Writing in American History

This series of classes is part history, part literature, part vocabulary lesson, part grammar, and a study of truly excellent persuasive writing. Each class will focus on one of three profoundly important written works in the history of the United States. This series offers a great opportunity for writers to examine the techniques of three very different writers from three different periods of time and how they managed to write convincing text at pivotal times in our country's history.

Instructor: .......................................................... L. Devereux
Fee: ...................................................................... $79 (per title)

OPTION 1: The Declaration of Independence
Date: ......................................................... August 11, 12, 13
Day: ............................................................ Tuesday, Wednesday, Thursday
Time: ............................................................. 6–8pm

OPTION 2: The Gettysburg Address
Date: ......................................................... August 18, 19, 20
Day: ............................................................ Tuesday, Wednesday, Thursday
Time: ............................................................. 6–8pm

OPTION 3: I Have A Dream
Date: ......................................................... August 25, 26, 27
Day: ............................................................ Tuesday, Wednesday, Thursday
Time: ............................................................. 6–8pm

The Poetic Shakespeare Series

This is a series of classes on various aspects of the genius of William Shakespeare's use of poetic tools. Take one or two classes on the topic of your choice, or take them all! Each class will be dedicated to one poetic topic. It is recommended that students bring paper and pencil for notetaking.

Will's Sound and Fury: This class explores the various sound devices that are employed in the works of William Shakespeare. We will look at examples from sonnets and plays to get a feel for the rich world of sound generated by the words that Shakespeare so carefully selected.

Will's Got Rhythm: This class explores the varied meters and poetic feet combined to create the maximum attention-getting effect. Marvel in the astounding impact the perfectly selected syllable can achieve.

Class description continues on next page.
Will’s Rhyme and Reason: Rhyming is more than just having the ends of the words sound the same. In this class we will explore the amazing variety available in rhyming poetry.

Will Takes a Stan(za): In this session we will take a close look at the structure and patterns in Shakespeare’s sonnets.

Will’s Witty Words and Wisdom: Our world is full of sayings, ideas and words that were coined by William Shakespeare. This class will examine the figurative language used by The Bard. Additionally, we will examine the tremendous influence the works of Shakespeare have had on our modern language.

Instructor: ......................................................... L. Devereux
Fee: ..................................................................... $49 (per title)

Writing Fiction for Publication 101
Writing Fiction for Publication 101 will walk a beginner or intermediate fiction writer through the different stages of getting their fiction writing ready for publication. The class will touch on the fiction genres, research, editing, the different types of publication, how the submission process works, potential for writing revenue and basic marketing pre-planning. The class is geared to writers who already have an understanding of basic grammar and punctuation and is not a class on how to write.

Instructor: ......................................................... Benson
Fee: ..................................................................... $89

OPTION
Date:  ........................ July 14, 15, 16
Day:  ........................ Tuesday, Wednesday, Thursday
Time:  ........................ 5:30–7:30pm

Writing Fiction for Publication 201
Writing Fiction for Publication 201 will walk an intermediate fiction writer through the different stages of getting their fiction writing ready for publication, touching on critique groups, beta readers and writer organizations; writing contests; different types of editors and agents, their functions, and how to find the right one for your writing style; common submission mistakes and how to avoid them; and costs of pre-and-post publication. The class is geared to intermediate writers with a solid grasp of grammar and punctuation, and who are nearing the end of, or have completed, their novella or novel. It is not a class on how to write.

Instructor: ......................................................... Benson
Fee: ..................................................................... $89

OPTION
Date:  ........................ July 28, 29, 30
Day:  ........................ Tuesday, Wednesday, Thursday
Time:  ........................ 5:30–7:30pm

Business & Industry Safety Compliance Training

Instructor: ......................................................... Pavelka

8-Hour HAZWOPER Refresher
This course is for employees trained in hazardous waste operations or who are exposed or could potentially be exposed to hazardous substances or health hazards and are required to attend a yearly refresher course as mandated by OSHA 29 CFR 1910.120. Verification of an 8-hour, 24-hour or 40-hour class required.

Fee: ..................................................................... $150

OPTION 1
Date:  ........................ June 9
Day:  ........................ Tuesday
Time:  ........................ 8am–5pm

OPTION 2
Date:  ........................ August 20
Day:  ........................ Thursday
Time:  ........................ 8am–5pm

24-Hour HAZWOPER
This course is specifically designed for employees who work on a site that has hazardous materials or respond to hazardous spills in their work location. These personnel have limited exposure to hazardous substances, but may still participate in cleanup operations, operations involving hazardous waste at a facility, or controlled emergency response operations. The class is designed to instruct individuals on how to avoid, recognize and prevent hazards in the workplace. Course instruction includes case studies and group activities. The course content meets the requirements established by OSHA in 29 CFR 1910.120. Class manuals provided, including current Emergency Response Guide.

Fee: ..................................................................... $499

OPTION
Date:  ........................ July 20, 21, 22
Day:  ........................ Monday, Tuesday, Wednesday
Time:  ........................ 8am–5pm

BBP Only (Bloodborne Pathogens)
One-hour training, with certification cards issued on day of class upon completion. Medic First is internationally recognized and is equivalent to American Red Cross and American Heart Association.

Fee: ..................................................................... $40

OPTION 1
Date:  ........................ July 1
Day:  ........................ Wednesday
Time:  ........................ 8–9am

OPTION 2
Date:  ........................ August 13
Day:  ........................ Thursday
Time:  ........................ 8–9am
Confined Space Entry Awareness

Participants will learn about applicable OSHA standards (29 CFR 1910 & 1926), responsibilities, key terminology, and identifying permit-required v. non-permit required spaces, personal protective equipment, physical and atmospheric hazards, air monitoring, and permits. Certificate of Completion card will be awarded to participants who pass the written test.

Fee: ................................................................. $99

**OPTION 1**
Date: ................................. June 10
Day: ..................................................... Wednesday
Time: ................................. 8am–12pm

**OPTION 2**
Date: ................................. July 8
Day: ..................................................... Wednesday
Time: ................................. 8am–12pm

**OPTION 3**
Date: ................................. August 26
Day: ..................................................... Wednesday
Time: ................................. 8am–12pm

First Aid/CPR/AED/BBP

One-day training, with certification cards issued on day of class upon completion for First Aid/CPR/AED and BBP (Medic First). Medic First is internationally recognized and is equivalent to American Red Cross and American Heart Association programs.

Fee: ................................................................. $100

**OPTION 1**
Date: ................................. July 1
Day: ..................................................... Wednesday
Time: ................................. 8am–1pm

**OPTION 2**
Date: ................................. August 13
Day: ..................................................... Thursday
Time: ................................. 8am–1pm

OSHA 10-Hour, Construction

This 10-hour course provides an excellent introductory course for all employees working in construction industries. It also provides a safety review for experienced personnel and supervisors of OSHA regulations, including recent or upcoming changes. The course content meets the OSHA requirements and includes, but is not limited to, the following topics: OSHA Act, Focus Four (falls, electrocution, struck-by and caught-between), PPE, health hazards/hazardous materials in construction, hand and power tools, stairs and ladders, excavation and ergonomics plus other topics. An OSHA 10 completion card will be issued by OSHA after the conclusion of class activities.

Fee: ................................................................. $150

**OPTION**
Date: ................................. July 6, 7
Day: ..................................................... Monday, Tuesday
Time: ................................. 8am–5pm (first day), 8am–12pm (second day)

OSHA 10-Hour, General Industry

This 10-hour course provides an excellent introductory course for all employees working in general industry including oil and gas. It also provides an appropriate review for experienced managers and supervisors of OSHA regulations, including recent or upcoming changes. The course content meets the OSHA requirements and includes, but is not limited to, the following topics: OSHA Act, HAZCOM, PPE, general safety provisions (e.g., tools and working surfaces), health hazards, fall protection, fire prevention, electrical safety, plus other topics.

Fee: ................................................................. $150

**OPTION 1**
Date: ................................. June 2, 3
Day: ..................................................... Tuesday, Wednesday
Time: ................................. 8am–5pm (first day), 8am–12pm (second day)

**OPTION 2**
Date: ................................. August 18, 19
Day: ..................................................... Tuesday, Wednesday
Time: ................................. 8am–5pm (first day), 8am–12pm (second day)

OSHA 30-Hour, Construction

The 30-hour course applies to safety coordinators, management, team leads and personnel who have responsibility for the safety of others and the company safety program. The course content meets the OSHA requirements and contains, but is not limited to, the following topics: OSHA Act and history, Focus Four, managing health and safety, powered industrial trucks, safety leadership, HAZCOM/GHS, PPE, recordkeeping, toxic and hazardous substances, excavations, stairways & ladders, fire prevention plans, emergency action plans, electrical safety, materials handling, excavation, hand and powered tools, and confined spaces. An OSHA 30 completion card will be issued by OSHA after the successful completion of class activities.

Fee: ................................................................. $499

**OPTION**
Date: ................................. July 13, 14, 15, 16
Day: ..................................................... Monday–Thursday
Time: ................................. 8am–5pm

Respirable Silica Awareness in Construction

This safety course discusses the basics of silica and respirable silica encountered during construction activities, identifies health hazards associated with exposure, discusses common construction tasks that could result in exposure, and reviews control measures that can be implemented to protect workers from exposure including engineering controls, work practices, and respirators. In addition, you will learn about the contents of the new OSHA regulation concerning silica and respirable crystalline silica and the basic requirements surrounding OSHA's new silica standard (e.g. exposure limits, housekeeping, written exposure control plan, medical monitoring, training, and recordkeeping). Class materials and completion certificate provided.

Fee: ................................................................. $50

**OPTION**
Date: ................................. July 7
Day: ..................................................... Tuesday
Time: ................................. 2–4pm
western Colorado Community College (WCCC) and Colorado Mesa University (CMU) support the growth and development of western Colorado youth during the summer break. They offer many experiential, hands-on learning opportunities for middle and high school students through summer camps. These interactive camps help students explore future career options, get a jumpstart on learning technical programs, develop strong personal skills and they are a lot of fun!

This booklet provides you with all the information you need to keep your child engaged this summer. Page 23 provides a weekly summary of all WCCC camps. The Reach Your Peak camps, offered at WCCC, are described in detail on pages 24 through 30.

ELIGIBILITY
Fifth graders going into the sixth grade in Fall 2020 are eligible for middle school camps. Eighth graders going into the ninth grade in Fall 2020 are eligible for high school camps.

REACH YOUR PEAK CAMPS AT WCCC
Reach Your Peak is a partnership between colleges in northwestern Colorado with the goal of creating excitement about learning and motivating students towards further education. Partners include Colorado Mesa University, Colorado Mountain College, Colorado Northwestern Community College and Western Colorado Community College.

The program is supported by the Northwest Regional Council of El Pomar Foundation. Through their generous Reach Your Peak grant program, WCCC is able to support these camps and make them affordable to all area youth. Be sure to review the camp descriptions in this catalog. You might find something your student never thought about exploring. Most of the camps are a week long and in most weeks campers can attend a session in the morning and then a different one in the afternoon. Camps fill quickly so please register as early as possible.

NOTE: At the time of publication, WCCC/CMU intends to host camps scheduled to start June 1 or later, but that may change depending upon guidance from public health officials.
REGISTRATION IS EASY:

Basic Welding and Fabrication .......................... 30

Camp scholarships and financial assistance:
To assure all students can follow their passions, limited scholarships and financial assistance that could discount the cost of camps as much as 70% are available. Please call 970.255.2800 to discuss available options prior to registration.

From camps to college: Students who complete one or more summer camps and one or more concurrent courses* on a WCCC/CMU campus during the school year may be eligible for a $2,000 scholarship each year for their first two years of college at CMU, WCCC, CMC or CNCC. Please call 970.255.2670 for more information.

*Concurrent courses are college courses taken while still enrolled in high school.

Western Colorado Community College and Colorado Mesa University reserve the right to cancel courses, change subject matter, alter time schedules or make other changes deemed necessary. At the time of publication, WCCC/CMU intends to host camps scheduled to start June 1 or later, but that may change depending upon guidance from public health officials.

Colorado Mesa University is committed to providing admission or access to, or treatment or employment in, its educational endeavors, consonant with applicable laws and without regard to race, creed, color, religion, sex, disability, age, national origin, veteran status, marital status or sexual orientation.

Universidad de Colorado Mesa está comprometida a proveer la admisión o acceso o tratamiento o empleo en su labor educativa, de acuerdo con las leyes aplicables y sin distinción de raza, credo, color, religión, sexo, discapacidad, edad, origen nacional, condición de veterano, estado civil u orientación sexual.

STEM Careers in Agriculture
Agriculture careers include so much more than farming and ranching! Do you like science? You could be an animal nutritionist, a geneticist, or a veterinarian! Like to work with your hands? You could be a diesel mechanic, meat inspector or farrier! More business oriented? You could be a marketing specialist, Ag loan officer or journalist! Come explore the many paths available in agriculture! Camp participants will explore a variety of careers in agriculture through hands on learning experiences.

Instructor: ............................................................. TBD
Price: ....................................................................... $120
Age Group: ............................................................. Middle School and High School
MIDDLE SCHOOL Date: ........................ June 1–5
Time: ............................................................. 8:30am–12:30pm
HIGH SCHOOL Date: ............................................................. 8:30am–12:30pm

What’s On Your Plate?
How does your food get from the farm to your plate? Campers will explore the science, technology, engineering, and mathematics in our non-animal food system. Come learn about technologies that are used in food production and harvesting. Each day has a different theme that will follow the path from production to harvest to marketing to consumer choices and food safety.

Instructor: ............................................................. TBD
Price: ....................................................................... $120
Age Group: ............................................................. Middle School and High School
MIDDLE SCHOOL Date: ........................ June 8–12
Time: ............................................................. 8:30am–12:30pm
HIGH SCHOOL Date: ............................................................. 8:30am–12:30pm

Meat You There!
During this camp, students will explore science, technology, engineering, and mathematics in animal agriculture. In this field trip based camp, students will explore wildlife and range conservation, raising healthy animals and animal feeding, dairy production and pasteurization, animal harvest (including anatomy and physiology), meat quality and assurance, and transportation.

Instructor: ............................................................. TBD
Price: ....................................................................... $120
Age Group: ............................................................. Middle School and High School
MIDDLE SCHOOL Date: ........................ June 15–19
Time: ............................................................. 8:30am–12:30pm
HIGH SCHOOL Date: ............................................................. 8:30am–12:30pm

Art Camp: Drawing
Calling all creative teens who are ready to learn and master new drawing skills. Explore the principles of drawing using pencils and charcoal. This fun-filled class will focus on skills that translate to any realistic drawing: light and shadow, line and tone, perspective and foreshortening. Practicing these basic skills, young artists will develop the confidence and ability to visually communicate their unique imaginative ideas.

Instructor: ............................................................. Mulder
Price: ....................................................................... $130
Age Group: ............................................................. Middle School and High School
Date: ............................................................. June 22–26
Time: ............................................................. 1–5pm

Art Camp: Painting & Mixed Media
Come delve into the wonderful world of visual arts! Learn about different mediums and techniques including painting, collage and printmaking. Enjoy working with textures, patterns, and layers of design to create fun and unique works or art - the possibilities are endless!

Instructor: ............................................................. Mulder
Price: ....................................................................... $130
Age Group: ............................................................. Middle School and High School
Date: ............................................................. July 6–10
Time: ............................................................. 8:30am–12:30pm

Art Camp: 3-Dimensional Art
This art will leap off the page! This fun, hands-on camp will teach different ways to create three-dimensional art. Students will work with a variety of art supplies such as paper, paint, and clay to create 3D masterpieces.

Instructor: ............................................................. Mulder
Price: ....................................................................... $130
Age Group: ............................................................. Middle School and High School
Date: ............................................................. July 20–24
Time: ............................................................. 1–5pm

Creative Writing
Do you love to write? Do you have stories in your head, but need help getting them down on paper? This camp is for you! Join other young writers in exploring and developing your writing abilities. This camp is designed to foster creativity, self-expression, and excitement about writing. Topics covered include setting, character development, plot structure, creating scenes from narrative, and revision. Students will have the opportunity to create and revise a short story/novel chapter, as well as design a book cover. Students will share parts of their work with the class and parents on the last day, and will leave with a bound copy of their work.

Instructor: ............................................................. Voth
Price: ....................................................................... $120
Age Group: ............................................................. Middle School and High School

Class description continues on next page.
Early Childhood Education

This camp is for those who are interested in working with young children from preschool age through second grade or are interested in how children develop. We will explore childhood growth and development using a variety of fun hands-on activities. We will explore careers in childcare and education, and learn more about what is involved in running a day care facility or school program.

Instructor:  ......................................................... Stelljes
Price:  ........................................................................ $95
Age Group:  ....................................................... 5th – 8th Grade

GRADES 5 – 6
Date:  ................................. June 1–5
Time:  ......................... 8:30am–12:30pm

GRADES 7 – 8
Date:  ................................. June 8–12
Time:  ......................... 8:30am–12:30pm

Where Are You Taking Your Talent?

Students are more engaged in academics when they have a vision for their future, and they work harder today if they see how it will help them personally tomorrow. In this camp, students will discover what their interests and passions for their career, hobby or lifestyle look like locally, globally and historically. Students will have the opportunity to interview local field experts with polished interview questions, and then create a PowerPoint presentation. With more knowledge, experiences, and a village of supporters, young people come out of high school with a clearer vision of what they want and don’t want, and how they’ll get to where they want to be.

Instructor:  ......................................................... Sündermann
Price:  ........................................................................ $100
Age Group:  ................................................. Middle School & High School

MIDDLE SCHOOL, OPTION 1
Date:  ................................. June 1–5
Time:  ......................... 1–5pm

MIDDLE SCHOOL, OPTION 2
Date:  ................................. June 8–12
Time:  ......................... 8:30am–12:30pm

MIDDLE & HIGH SCHOOL
Date:  ................................. July 6–10
Time:  ......................... 8:30am–12:30pm

You’ve Got Skills! Job Readiness for Youth

Join this interactive and hands-on camp to learn essential skills for your summer and future job searches. Get started early in building a resume that will showcase your talents and experiences to help in the transition from school to the workplace. Learn who you are through fun personality testing and ability profiling activities. Explore ways of marketing yourself to employers and discover your abilities and assets. Learn how to build a resume, complete job applications, do well in an interview and find employment.

Instructor:  ......................................................... Hein
Price:  ........................................................................ $100
Age Group:  ............................................. Middle School & High School

Date:  ................................. June 1–5
Time:  ......................... 1–5pm

Chef Camp: Handmade Pastas

Come for a fun week of mixing, kneading, rolling and cutting out handmade pastas that will be paired with seasonal sauces! Students will be making pasta from scratch for dishes like Pasta Primavera, Pasta Bolognese, Wild Mushroom filled Raviolis, Fettuccine Alfredo, and handmade Spaghetti and Meatballs! In the Bake Shop, we’ll make Chocolate Pasta served with a Hazelnut cream and a Butterscotch Budino, Pasta Parcels, and a ravioli pasta filled with sweet fruits! This week PASTA!

Chef Camp: The Love of The Egg

Egg dishes are in all types of culinary cuisine. Eggs are breakfast, lunch, and dinner! Let’s explore the egg both in Culinary and Baking. We will be teaching how to boil, poach, sauté, and scramble eggs properly. From omelets to hollandaise, eggs will become part of your day’s skills. Quiche served with a side salad makes a great lunch! How about Frittatas for breakfast with fresh orange juice and hash browns! For dinner, why not buttermilk pancakes served with a poached egg, potato fries, and ham. Then, in the Bake Shop, crepes with ice cream and fruit! Bread made for French toast and eclairs filled with pastry cream. Join!!

SCHOLARSHIPS AND FINANCIAL ASSISTANCE

To ensure all students are able to follow their passions, a limited number of scholarships and financial assistance is available.

Discounts could cover as much as 70% of the cost of the camps.

Please call 970.255.2800 to discuss available options prior to registration.
Chef Camp: Petits Fours
Petits Fours is the French word for “small ovens”. Petits Fours is a small bite sized confectionery or savory appetizer. This camp will cover bite size desserts! Small bites of cheese cake square with fruit and chocolate garnishes. Lava cakes drizzled with caramel sauce. French madeleine cookies served with hot-spiced teas. Mini lemon tartlets topped in meringue finished with a blowtorch to give it that fireside look. Florentine cookies coated in chocolate and served with ice cream. Truffles, bite sized cakes and more bite sized desserts! A summer filled with sweets and fun!

Instructor: ............................................................. Henderson (Middle School); Jolley (Middle & High School)
Price: ........................................................................ $180
Age Group: ............................................................. Middle School & High School

Chef Camp: Street Food
What’s popular today is Street Food! It is in all cultures around the world. It’s a survival cuisine and possibly the truest food you will ever taste. This camp will be a tour of street food of Southeast Asia! We’ll be making Bao Dough Dumplings, which are a steamed, fluffy Chinese bun filled with meat and vegetables! We’ll also make Chicken Satays! Satays are some of the most famous street foods in Southeast Asia. How about Vietnamese spring rolls served with spicy peanut sauces (one of my favorites). From Japan we’ll make Katsu Don, pork loin sliced very thin and dipped in egg and bread crumbs served with sushi rice and dashi accompanied with Tempura vegetables and seafood. For desserts, fruit smoothies and sweet rice balls. Come discover Street Foods!

Instructor: ............................................................. Henderson (Middle School), Jolley (Middle & High School)
Price: ........................................................................ $180
Age Group: ............................................................. Middle School & High School

Critter Camp: Going Wild (4 day camp)
Explore the diversity of Colorado’s wildlife with guest speakers — both human and non-human. Test your powers of observation and inference on nature walks and in games like charades. Learn how to encourage nature’s diversity in our own back yards by making bird feeders and other projects from recycled materials. Demonstrate a commitment to keeping Colorado wild and educating others.

Instructor: ............................................................. Whitney
Price: ........................................................................ $95
Age Group: ............................................................. Middle School
Date: ....................................................................... June 29–July 2
Time: ........................................................................ 8:30am–12:30pm

Let’s Fly! Introduction to Aviation
This camp is for anyone who is interested in Aviation. Explore the intriguing aspects of Aviation from how an aircraft is built to the aerodynamic aspects of what makes planes fly and how weather affects flight. This camp is also an opportunity to discover careers in Aviation and show possible routes to get there.

Instructor: ............................................................. Miller
Price: ........................................................................ $120
Age Group: ............................................................. High School

Pediatric First Aid/CPR (1 day camp)
If you like working with young children, as a babysitter or camp volunteer, then this is an important camp for you! Come learn infant and child cardiopulmonary resuscitation (CPR) and first aid, and gain critical skills for working with children as a summer job. This camp will give you confidence when you’re with small children, and it will look great on a resume. Campers will gain an American Safety and Health Institute (ASHI) certification in pediatric CPR and automated external defibrillator (AED) along with training in some critical first aid skills.

Instructor: ............................................................. Winfrey
Price: ........................................................................ $49
Age Group: ............................................................. Middle School and High School

Adventures in 3D Printing and 3D Modeling
Learn how 3D printing is changing manufacturing and how you can make things for yourself. Using the 3D Computer Aided Design software Autodesk Inventor, you will learn how to draw 3D models and download them to the 3D printer to generate real parts from your drawings. No experience necessary. Join us and experience the world of 3D printing. *We also have a Build a 3D Printer camp, where students can build and take home their own 3D Printer.

Class description continues on next page.
Instructor: .......................................................... Mahoney
Price: .................................................................. $140
Age Group: .......................................................... Middle School & High School

MIDDLE SCHOOL
Date: ......................... June 15–19
Time: ........................ 8:30am–12:30pm

HIGH SCHOOL, OPTION 1
Date: ........................ June 8–12
Time: ........................ 8:30am–12:30pm

Date: ........................ June 22–26
Time: ........................ 8:30am–12:30pm

Build a 3D Printer
3D printing changed the way inventors take their ideas from thought to reality. In this camp, you will build and tune your very own 3D Printer that is capable of printing plastic parts. You will take your 3D printer home to enjoy making products at home. No experience required.

* Consider taking our Adventures in 3D Printing and 3D Modeling camp to learn how to use the 3D printer you’ll be building in this camp!

Instructor: ............................................................ Antoun
Price: .................................................................. $120
Age Group: .......................................................... High School

MIDDLE SCHOOL
Date: ......................... July 20–24
Time: ........................ 1–5pm

HIGH SCHOOL
Date: ........................ July 27–31
Time: ........................ 8:30am–12:30pm

Build a Computerized Milling Machine (CNC Machine)
Come to this camp and with the help of the instructor and other campers build a CNC Milling machine. A machine a computer can control to make precise etchings and shapes in wood, plastic, and soft metals. Once kits are built instructor will show how to create your own designs using no-cost software and cut example pieces from wood and plastic.

Instructor: ............................................................ Antoun
Price: .................................................................. $300
Age Group: .......................................................... High School

OPTION 1
Date: ........................ June 15–19
Time: ........................ 1–5pm

OPTION 2
Date: ........................ July 13–17
Time: ........................ 8:30am–12:30pm

Building Internet of Things (IOT): Devices
Do you want to create your own fitness tracker? Do you want to make a device that lights up based on your movement? In this summer camp, you will learn how to use the latest embedded devices that are used in the Internet of Things. You will be able to create anything from a coffee pot that tells you it’s ready, to a dress that lights up as you move. You get to keep the kit of parts. No prior experience needed.

Instructor: ............................................................ Antoun
Price: .................................................................. $170
Age Group: .......................................................... High School

OPTION 1
Date: ........................ June 8–12
Time: ........................ 8:30am–12:30pm

OPTION 2
Date: ........................ July 20–24
Time: ........................ 1–5pm

Coding Camp
Learn the fundamentals of C++, one of the world’s most essential programming languages, with applications spanning from system software design to game development. C++ opens the door to the vast world of coding and development, no matter what you want to create. Using your newfound coding skills, create projects and test your growing knowledge with job interview-style coding challenges.

Instructor: ............................................................. Antoun
Price: .................................................................. $120
Age Group: .......................................................... High School

Date: ........................ July 13–17
Time: ........................ 8:30am–12:30pm

Cyber Camp: Crack the Secret Code!
Learn to encode and decode secret messages. Learn to crack other peoples encoded messages. Then learn how to protect you and your family by understanding how hackers and scammers trick people into giving up information they should not. This camp will demonstrate the Gen-Cyber principles of “Think like an adversary”, “Data Encoding”, and “Layering”.

Instructor: .............................................................. Castleton
Price: .................................................................. $120
Age Group: .......................................................... Middle School & High School

OPTION 1
Date: ........................ June 8–12
Time: ........................ 8:30am–12:30pm

OPTION 2
Date: ........................ July 27–31
Time: ........................ 8:30am–12:30pm

Drone Piloting
Learn how drones work by programming and flying your own CoDrone (must be registered). All drone operation fundamentals are covered in this camp. Campers will program their drone to fly by remote control (iPhone or Android phone required) and autonomously fly a route programmed into it. Each camper will have a drone to take home to continue to enjoy.

Instructor: .............................................................. Felmlee
Price: .................................................................. $280
Age Group: .......................................................... Middle School and High School

Date: ........................ June 22–26
Time: ........................ 8:30am–12:30pm

How to Design/Shop/Build Your Own Computer (3 day camp)
If you’ve thought about building your own custom computer, this camp is for you! Learn how to design your own computer so that its functions fit your needs. Then discover how to select the right parts, and how to buy them at the best price. Hands-on assembly of computers in our lab will ensure that you receive the skills you need to build your own computer.

Instructor: ............................................................. Antoun
Price: .................................................................. $70
Age Group: .......................................................... Middle School and High School

Date: ........................ July 27–29
Time: ........................ 8:30am–12:30pm

Lego Robotics
Build – Code – Experiment! During this camp, you will design, build and program Star Wars Droid robots using the LEGO Star Wars Droid Commander. Through this process, campers will gain advanced building skills, use a drag and drop software program and use their robot to compete against other teams. Boost your LEGO building experience with the amazing LEGO BOOST Creative Toolbox. Build and customize your own personal talking robot friend, and code its behavior, teach him to play tag with other robots then take it home to do even more. Campers must bring their own iPad to control the robot. Accepted iPad versions are iPad Pro, Air 2, 3 or 4, Mini 2, 3, or 4th Generation.

Instructor: ............................................................. Antoun
Price: .................................................................. $280
Age Group: .......................................................... Middle School and High School

Date: ........................ July 6–10

Robot Cars! Introduction to Arduinos Coding

Arduinos are inexpensive, easy-to-program microcomputers that have spawned thousands of new inventions. In this course, you will learn how to build and program a simple robotic car that uses an Arduino for its “brain.” At the end of the five-day camp, you will compete with other camp participants to see whose car can finish an obstacle course in the shortest amount of time. You get to keep the kit of parts. No prior experience necessary.

Acting Camp: Acting in the Movies

Have you ever dreamed of being on the silver screen? Ever wondered what it takes for an actor to work on a movie? During this camp, you'll work with both comedic and dramatic material, learn on-camera acting techniques through fun games and exercises, and perform monologues and scenes on camera. Each student will receive a digital copy of their monologue and scene at the end of the camp. This camp is open to all levels of experience.

Instructor: .......................................................... Brachfeld
Price: ................................................................. $110
Age Group: ............................................................. Middle School and High School

Date: ................................................................. June 8–12
Time: ................................................................ 1–5pm

Acting Camp: Comedy Acting

Want to develop your self-confidence and comedy chops? This camp will bring out the comedian in you! We’ll explore the wonderful world of comedic acting through exercises and games at each class. In a supportive and encouraging environment, you’ll be able to stretch your comedy wings. You’ll learn short form improvisational technique, commedia dell’arte, classic comedy routines and styles and perform your own short stand-up routine or comedy monologue. This camp is open to all levels of experience.

Instructor: .......................................................... Brachfeld
Price: ................................................................. $110
Age Group: ............................................................. Middle School and High School

Date: ................................................................. June 15–19
Time: ................................................................ 1–5pm

Acting Camp: Shakespeare

All great actors study Shakespeare. During this camp, you'll learn fundamental acting techniques, develop the ability to transform into character through movement and voice work, establish tools for script analysis, learn basic stage combat with swords, and perform a scene in front of your friends and family from one of the Bard’s plays. This camp is open to all levels of experience.

Instructor: .......................................................... Brachfeld
Price: ................................................................. $110
Age Group: ............................................................. Middle School and High School

Date: ................................................................. June 22–26
Time: ................................................................ 1–5pm

Comic Book Creation

This camp will cover fundamental skills and techniques required to design and complete a hand-drawn comic book. Western, Japanese and alternative styles will be explored as students learn the process of transforming a script into storyboards and a final inked product. Technical elements include framing and panel layout, shading techniques, inking with micron and dip pens, and digital lettering.

Instructor: .......................................................... Hoffman
Price: ................................................................. $120
Age Group: ............................................................. Middle School and High School

Date: ................................................................. June 8–12
Time: ................................................................ 1–5pm

Digital Illustration

Would you like your drawings to look like the professional artwork you see on your favorite websites? From concept art to final illustration, this class will train you in everything you need to know about drawing digitally. Learn essential fine art skills while gaining experience drawing with a tablet. Come draw with us!

Instructor: .......................................................... Hoffman
Price: ................................................................. $120
Age Group: ............................................................. Middle School and High School

DATE: ........................................................................
TIME: ................................................................

Digital Photography from Click to Computer

Explore and share your vision from behind the lens. This camp will use DSLR cameras and Adobe Photoshop to produce pictures like a pro. We will experiment with artistic and technical tricks of the trade and host an end-of-session gallery opening to highlight your favorite pieces. You will be able to take home the start of your very own professional portfolio.

Instructor: .......................................................... Meuwly/Miller
Price: ............................................................... $120

**STEM: MANUFACTURING**

**Auto Mechanics, Level 1: Hands-on Exploration**

Come to WCCC this summer and get a taste of what it is like to work on automobiles. You will learn how engines work and the rest of the 8 main components of cars. You will work in fully equipped shops with tools and automobiles that can be taken apart and put back together. With the guidance of our experienced instructors, you will apply science and math skills in real work situations and learn about careers in the automobile industry.

Instructor: ................................................................. Goetz/Carsten
Price: ................................................................. $130
Age Group: ................................................................. Middle School and High School
Date: ................................................................. June 1–5
Time: ................................................................. 8:30am–12:30pm

**Auto Mechanics, Level 2: Hands-on Exploration**

Come back to WCCC auto camp for a week of more in-depth and technical work with electrical, brakes, suspension and more. Find out if you really enjoy working on cars by using more advanced tools and exploring the automotive field in more detail. If you have attended the camp before, have completed Level 1 this year, or have previous experience, you are welcome to join us.

Instructor: ................................................................. Goetz/Carsten
Price: ................................................................. $130
Age Group: ................................................................. Middle School and High School
Date: ................................................................. June 8–12
Time: ................................................................. 8:30am–12:30pm

**Basic Welding and Fabrication**

Learn the basics of welder safety; cutting and welding techniques, and how to apply them to real world projects. Students will be using welding and cutting equipment just like professional welders would use. Learn about the career options available with training in this field while having some hands-on experience.

Instructor: ................................................................. Kirkland
Price: ................................................................. $150
Age Group: ................................................................. Middle School and High School

MIDDLE SCHOOL
Date: ................................................................. August 3–7
Time: ................................................................. 8:30am–12:30pm

HIGH SCHOOL
Date: ................................................................. August 3–7

Send the kids to college this summer! In addition to more than 80 hands-on learning experiences through Western Colorado Community College (WCCC) and Reach Your Peak Colorado, Colorado Mesa University (CMU) offers a variety of programs for elementary, middle and high school students including academic, performing arts and athletic camps and clinics. Open the door to something that may ignite a fire within your kid for the future. Go to coloradomesa.edu/summer and explore all the options.

**Athletic Camps**
More than 15 athletic camps, including overnight camps, are offered on CMU’s main campus. Practice baseball, basketball, cheerleading, soccer, softball and much more.

**GirlsDoMath**
Girls who love math come together to engage in the exploration, research and discussion of mathematical ideas guided by female professors, teachers and undergraduate math students.

**Music Camps**
The CMU Department of Music offers summer camps for elementary, middle and high school youth.

**Camps at CMU Montrose**
More than 20 camps are offered throughout the summer on CMU’s Montrose campus. Explore engineering, food science, movie making, art, photography, Vex robotics and much more! Visit coloradomesa.edu/montrose/camps for details.
